* Endotracheal tube size and positioning
* Emergency management of seizures, asthma, anaphylaxis, and electrolyte disorders
New edition, extensively revised.

Pediatric Palliative Care
Churchill Livingstone
For patients and their

loved ones, no care decisions are more profound than those made near the end of life. Unfortunately, the experience of dying in the United States is often characterized by fragmented care, inadequate treatment of distressing symptoms, frequent transitions among care settings, and enormous care responsibilities for families. According to this report, the current health care system of rendering more intensive services than are necessary and desired by patients, and the lack of coordination among programs increases risks to patients and creates avoidable burdens on them and their families. Dying in America is a study of the current state of health

care for persons of all ages who are nearing the end of life. Death is not a strictly medical event. Ideally, health care for those nearing the end of life harmonizes with social, psychological, and spiritual support. All people with advanced illnesses who may be approaching the end of life are entitled to access to high-quality, compassionate, evidence-based care, consistent with their wishes. Dying in America evaluates strategies to integrate care into a person- and family-centered, team-based framework, and makes recommendations to create a system that coordinates care and supports and respects the choices of patients and their families. The findings and recommendations of

this report will address the needs of patients and their families and assist policy makers, clinicians and their educational and credentialing bodies, leaders of health care delivery and financing organizations, researchers, public and private funders, religious and community leaders, advocates of better care, journalists, and the public to provide the best care possible for people nearing the end of life.

requirement -- Utstein

guideline -- endorsed data elements for reporting out-of-hospital cardiac arrest.

Advanced Paediatric Life Support Bmj Publishing Group

This practical book, written especially for pre-hospital staff, provides all the information needed to deal with children in life threatening situations before arriving at hospital.

Complementing the best-selling *Advanced Paediatric Life Support*, this new edition reflects recent developments in practice, and covers the indispensable knowledge required for paediatric emergency care in the pre-hospital setting. Fully updated, this manual includes new information to aid both civilian and military personnel, as well as material on all stages of pre-hospital care; from recognition and practical procedures to the important issues of paediatric practice in the field. Quick-to-follow algorithms of 'at-the-scene' procedures Based upon the protocols that ensure a smooth transfer from pre-hospital to hospital care

Internationally recognised course training resource

Offering an authoritative guide to the care of the seriously ill or injured

child, *Pre-Hospital Paediatric Life Support* is an essential tool for ambulance staff, general practitioners and community healthcare workers.

Pediatric Resuscitation

Jones & Bartlett Publishers

This new edition of the bestselling *Pocket Guide to Teaching for Medical Instructors* by the

Advanced Life Support Group and Resuscitation Council (UK) provides an

updated guide for instructors teaching on life support courses.

Compiled by authors experienced in designing highly respected and successful courses, this guide gives sound, clear advice on the most

effective methods of teaching. Content covers an introduction to the

basic principles of teaching and deals in detail with a number of

modes of teaching on courses. Lectures, skill stations, role play,

workshops, discussions and e-learning are all explored and in each case

practical guidance is given to help the reader to become a more

effective teacher. Though designed for trainees on life support instructor

courses, *Pocket Guide to Teaching for Medical Instructors* contains

practical guidance applicable to any health professional interested in becoming a more effective teacher.

Core Topics in Paediatric Anaesthesia

Cambridge University Press

Pediatric Resuscitation is reviewed in this issue of *Pediatric Clinics of North America*, guest edited by Drs. Steve Schexnayder and Arno Zaritsky.

Authorities in the field have come together to pen articles on Background and Epidemiology; CPR - Why the New Emphasis?; Airway Management; Arrhythmias, Cardioversion, and Defibrillation; Vascular Access and Medications; Medical Emergency Teams; Teamwork in Resuscitation; Resuscitation Education; Outcome Following Cardiac Arrest; Extracorporeal Life Support during CPR; Post-resuscitation Care; and Future Directions.

2020 Handbook of Emergency Cardiovascular Care for Healthcare Providers

Elsevier Health Sciences
This book covers all of the important elements of paediatric anaesthesia in a concise and structured manner. From the

premature infant to the teenager, readers are guided through the complexities they may encounter, with key points at the end of each chapter to summarise the most important information. The common surgical conditions encountered in daily practice are covered along with comprehensive discussion of consent and the law, safeguarding children, and the complexity of drug dosing in the paediatric population. Other topics covered include trauma, burns, resuscitation, principles of intensive care, and transporting a sick child. Each chapter is written by an acknowledged expert in their field, sharing a wealth of relevant, practical experience. Covering the whole curriculum necessary for advanced training, this is essential reading for trainees, general anaesthetists managing children in non-specialist hospitals and anyone aspiring to become a paediatric anaesthetist, as well as those established in the field.

Advanced Paediatric Life Support OUP Oxford

This practical book written especially for prehospital staff provides all the information needed to

deal with children in life threatening situations before arriving at hospital. It is a complementary volume to the best-selling *Advanced Paediatric Life Support*

Advanced Paediatric Life Support, Australia and New Zealand

Elsevier Health Sciences 20-1100

Pediatric Fundamental Critical Care Support, Second Edition John Wiley & Sons

This international bestselling book on acute paediatric care is the coursebook for the *Advanced Life Support Group's Advanced Paediatric Life Support (APLS)*. It uses their practical approach, a tried and tested method of treating children during the crucial first few hours of a life threatening condition. This edition has been adapted specifically for use in Australia and New Zealand, with the latest procedures, medications and clinical best practice to match the guidelines of the Australia and New Zealand Resuscitation Councils. *Advanced Paediatric Life Support* is used in emergency and paediatric departments by physicians, nurses and allied health professionals, and its

clear layout and straightforward style make it a highly practical tool both for training and in the event of an emergency. The fifth edition includes major new features bringing it right up to date, including: The latest International Liaison Committee on Resuscitation (ILCOR) 2010 Guidelines A new and improved design including full colour photographs and diagrams Fully adapted for use in Australia and New Zealand New sections for Australasian-specific practice, including envenomation, burns, triage, neonatal resuscitation and formulary With this book at hand, paediatric and emergency staff can be confident in having comprehensive and authoritative guidance on the first principles of recognising life threatening conditions through to all the procedures necessary to save a child's life.

Pediatric Emergency Assessment, Recognition, and Stabilization BMJ Books Advanced Paediatric Life Support is the internationally renowned manual on emergency paediatric care, written to support the course run by

the Advanced Life Support Group. Using their structured approach, a tried and tested practical method of treating children during the crucial first few hours of a life threatening illness or injury, Advanced Paediatric Life Support is used by doctors, nurses and allied health professionals dealing with emergencies in children. Its clear layout and straightforward style make it a highly practical tool both for training and in the event of an emergency. The sixth edition includes major new features bringing it right up to date, including: The latest International Liaison Committee on Resuscitation (ILCOR) 2015 Guidelines The latest consensus guidelines on paediatric trauma Enhanced discussions on the importance of human factors A new and improved design including full colour photographs and diagrams Free access to the Wiley E-Text With this book at hand, all those providing care during paediatric emergencies can be confident in having comprehensive and authoritative guidance on the recognition and management of life

threatening conditions necessary to save a child's life. This title is also available as a mobile App from MedHand Mobile Libraries. Buy it now from iTunes, Google Play or the MedHand Store.

Pre-Hospital Paediatric Life Support John Wiley & Sons

The first volume in the "What Do I Do Now?: Emergency Medicine" series, Pediatric Medical Emergencies uses a case-based approach to cover common and important topics in the examination, investigation, and management of acutely ill children. Each chapter provides a discussion of the diagnosis, key points to remember, and selected references for further reading. Areas of controversy are clearly delineated with a discussion regarding evidence-based options and a balanced view of treatment and disposition decisions. The book addresses a wide range of topics including neonatal fever, pediatric sepsis, intussusception, and more, and is suited for emergency medicine providers and pediatricians. Pediatric Medical Emergencies is an engaging collection of thought-provoking cases which clinicians can utilize

when they encounter difficult pediatric patients. The volume is also a self-assessment tool that tests the reader's ability to answer the question, "What do I do now?"

Nursing Care of the Critically Ill Child Oxford University Press

A comprehensive textbook of paediatric emergency medicine for trainee doctors - covers all the problems likely to present to a trainee in the emergency department. Short concise chapters, with key point boxes at the beginning - easy to use for the hard-pressed trainee. Aims to give a consensus approach to assessment and treatment, based on the latest evidence. Highlights areas of controversy.

Accidents and Emergencies in Children

John Wiley & Sons
