The Fifth Assessment Report of the IPCC is the standard scientific reference on climate change for students, researchers and policy makers.

Education in Malaysia Cambridge University Press

The Soil Conservation Service (SCS) curve number (CN) method is one of the most popular methods for computing the runoff volume from a rainstorm. It is popular because it is simple, easy to understand and apply, and stable, and accounts for most of the runoff producing watershed characteristics, such as soil type, land use, hydrologic condition, and antecedent moisture condition. The SCS-CN method was originally developed for its use on small agricultural watersheds and has since been extended and applied to rural, forest and urban watersheds. Since the inception of the method, it has been applied to a wide range of environments. In recent years, the method has received much attention in the hydrologic literature. The SCS-CN method was first published in 1956 in Section-4 of the National Engineering Handbook of Soil Conservation Service (now called the Natural Resources Conservation Service), U. S. Department of Agriculture. The publication has since been revised several times. However, the contents of the methodology have been nonetheless more or less the same. Being an agency methodology, the method has not passed through the process of a peer review and is, in general, accepted in the form it exists. Despite several limitations of the method and even questionable credibility at times, it has been in continuous use for the simple reason that it works fairly well at the field level.

Carbon Dioxide Capture and Storage CRC Press

This book provides a path-breaking study of the genesis, growth, gains, and dilemmas of women's movements in countries throughout the world. Its focus is

on the global South, where women's movements have engaged in complex negotiations with national and international forces. It challenges widely held assumptions about the Western origins and character of local feminisms. The authors locate women's movements within the terrain from which they emerged by exploring their relationships with the state, civil society, and other social movements. This fully revised second edition contains six new chapters by leading scholars of women and gender studies, on both individual countries and on several major regions of the world? Europe, Africa, Latin America, and the Maghreb. This balanced coverage enables readers to identify regional patterns and also learn from in-depth case studies. *Women's Movements in the Global Era* is essential reading for anyone interested in the global scope and implications of feminism.

The Cambridge Handbook of Class Actions Springer

This book discusses multilingual postcolonial common law, focusing on Malaysia's efforts to shift the language of law from English to Malay, and weighing the pros and cons of planned language shift as a solution to language-based disadvantage before the law in jurisdictions where the majority of citizens lack proficiency in the traditional legal medium. Through analysis of legislation and policy documents, interviews with lawyers, law students and law lecturers, and observations of court proceedings and law lectures, the book reflects on what is entailed in changing the language of the law. It reviews the implications of societal bilingualism for postcolonial justice systems, and raises an important question for language planners to consider: if the language of the law is changed, what else about the law changes?

PMBOK® Guide is the go-to resource for project management practitioners. The project management profession has significantly evolved due to emerging technology, new approaches and rapid market changes. Reflecting this evolution, The Standard for Project Management enumerates 12 principles of project management and the PMBOK® Guide & Seventh Edition is structured around eight project performance domains. This edition is designed to address practitioners' current and future needs and to help them be more proactive, innovative and nimble in enabling desired project outcomes. This edition of the PMBOK® Guide: • Reflects the full range of development approaches (predictive, adaptive, hybrid, etc.); • Provides an entire section devoted to tailoring the development approach and processes; • Includes an expanded list of models, methods, and artifacts; • Focuses on not just delivering project outputs but also enabling outcomes; and • Integrates with PMI standards+™ for information and standards application content based on project type, development approach, and industry sector.

This book gives a comprehensive overview on Software Product Management (SPM) for beginners as well as best practices, methodology and in-depth discussions for experienced product managers. This includes product strategy, product planning, participation in strategic management activities and orchestration of the functional units of the company. The book is based on the results of the International Software Product Management Association (ISPMA) which is led by a group of SPM experts from industry and research with the goal to foster software product management excellence across industries. This book

can be used as textbook for ISPMA-based education and as guide for anybody interested in SPM as one of the most exciting and challenging disciplines in the business of software. Hans-Bernd Kittlaus is the Chairman of ISPMA and owner and managing director of InnoTivum Consulting, Germany. Samuel Fricker is Board Member of ISPMA and Professor at FHNW, Switzerland.

Contemporary Task-Based Language Teaching in Asia Psychology Press

From Thomas Jefferson to John Rawls, justice has been at the center of America's self-image and national creed. At the same time, for many of its peoples—from African slaves and European immigrants to women and the poor—the American experience has been defined by injustice: oppression, disenfranchisement, violence, and prejudice. In *Identity and the Failure of America*, John Michael explores the contradictions between a mythic national identity promising justice to all and the realities of a divided, hierarchical, and frequently iniquitous history and social order. Through a series of insightful readings, Michael analyzes such cultural moments as the epic dramatization of the tension between individual ambition and communal complicity in *Moby-Dick*, "attempts to effect social change through sympathy in the novels of Lydia Marie Child and Harriet Beecher Stowe, Ralph Waldo Emerson's antislavery activism and Frederick Douglass's long fight for racial equity, and the divisive figures of John Brown and Nat Turner in American letters and memory. Focusing on exemplary instances when the nature of the United States as an essentially conflicted nation turned to force, Michael ultimately posits the development of a more cosmopolitan American identity, one that is more fully and justly imagined in response to the nation's ethical failings at home and abroad. John Michael is professor of English and of visual and cultural studies at the University of Rochester. He is the author of *Anxious Intellectuals: Academic Professionals, Public Intellectuals, and Enlightenment Values and Emerson* and *Skepticism: The Cipher of the World*." This book draws on elements of critical social theory, research on globalization, neo liberalism and education, and Malaysian Studies to understand the interplay of globalization, nationalism, cultural politics and ethnicized neoliberalism in shaping the educational reforms in Malaysia. Using the Malaysia Education Blueprint 2013-2025 (MEB) as a case study, a catalyst and a context, this

collection critically explores some of the complex historical and contemporary push-pull politics and factors shaping Malaysia's education system, its reform and the experience of Malaysians – and others – within it. The authors in this volume focus on the interplay of neoliberalism, nationalism, ethnic and cultural politics in shaping the educational reforms in Malaysia. Their work captures and seeks to understand the enduring, though changing, hierarchy of access and differentiated rights to educational, social and economic resources and opportunities experienced by different individuals and collectives, including those involved in the neoliberal enterprise of international education. It looks at how inequities have been re-configured in different educational spaces in Malaysia, and at how these inequities have been addressed through reform policies and practices. The book will be a shaper and critical contributor to the assessment of the Malaysian Education Blueprint and related policies. It will also have wider relevance globally as a critical approach to policy discussion. [A Guide to the Project Management Body of Knowledge \(PMBOK® Guide\) – Seventh Edition and The Standard for Project Management \(BRAZILIAN PORTUGUESE\)](#) Penguin

The four principles that can help us to overcome our brains' natural biases to make better, more informed decisions—in our lives, careers, families and organizations. In *Decisive*, Chip Heath and Dan Heath, the bestselling authors of *Made to Stick* and *Switch*, tackle the thorny problem of how to overcome our natural biases and irrational thinking to make better decisions, about our work, lives, companies and careers. When it comes to decision making, our brains are flawed instruments. But given that we are biologically hard-wired to act foolishly and behave irrationally at times, how can we do better? A number of recent bestsellers have identified how irrational our decision making can be. But being aware of a bias doesn't correct it, just as knowing that you are nearsighted doesn't help you to see better. In *Decisive*, the Heath brothers, drawing on extensive studies, stories and research, offer specific, practical tools that can help us to think more clearly about our options, and get out of our heads, to improve our decision making, at work and at home.

This book examines Malaysia's educational landscape, providing a contemporary study of key themes that have emerged in this multicultural, multi-ethnic society, as it attempts to shift from a middle-income to a high-income nation. Combining contributions by scholars from various fields—such as economics, history, sociology, political science and, of course, education—the book provides richer insights into Malaysia. Offering a unique resource, it will be of particular interest to educators, researchers, students, policymakers and members of the public who want to be updated on the latest trends and challenges in Malaysian education.

Language Choice in Postcolonial Law Cambridge University Press

The strengths and abilities children develop from infancy through adolescence are crucial for their physical, emotional, and cognitive growth, which in turn help them to achieve success in school and to become responsible, economically self-sufficient, and healthy adults. Capable, responsible, and healthy adults are clearly the foundation of a well-functioning and prosperous society, yet America's future is not as secure as it could be because millions of American children live in families with incomes below the poverty line. A wealth of evidence suggests that a lack of adequate economic resources for families with children compromises these children's ability to grow and achieve adult success, hurting them and the broader society. *A Roadmap to Reducing Child Poverty* reviews the research on linkages between child poverty and child well-being, and analyzes the poverty-reducing effects of major assistance programs directed at children and families. This report also provides policy and program recommendations for reducing the number of children living in poverty in the United States by half within 10 years.

Scientific American Springer

Researchers have looked into the role of individual differences in second language learning and found that differences between learners in areas such as language aptitude, language learning motivation and exposure to the language influence second language learning. Most of this research concerned adults. Far fewer studies have addressed the role of individual differences in second language learning of young learners. As second language learning programmes tend to start earlier than before and children are nowadays frequently exposed to a foreign language in social settings such as online games and social media, studying the role

of individual differences in young learners can contribute both to SLA-theories and to evidence-based L2 education. This book discusses recent findings concerning the role of individual differences in language learning in young learners. The chapters in the book concern different topics linked to internal individual differences such as language aptitude, motivation, attitude and external individual differences such as exposure and type of instruction, the relative contribution of internal and external factors to language learning, and the interplay between the two types of individual differences.

Routledge

Over the last decade task-based approaches to language learning and teaching (TBLT) have become a global focus of increased levels of research. Governments around the world have turned to TBLT as a potential solution for curricula that lack authentic and meaningful engagement with language learning and are failing to motivate students as a result. This book focuses on Asia, where this shift has been particularly in evidence. TBLT has often been implemented in top-down approaches to curriculum development, which presents a huge range of challenges at the cultural as well as the pedagogic level. Contemporary Task Based Language Teaching in Asia looks at the drivers, stakeholders and obstacles across the region. Some countries have adapted TBLT to deal with

the local constraints, others have found it hard to apply and many are still in the process of investigating its implementation in their specific contexts. This collection is important to all involved in language development, from curriculum reform to materials development. It assists from programme evaluation to the setting of assessment standards. The chapters cover all aspects of language education across Asia, from primary to tertiary, private and public education, as well as innovations at local, regional and national levels.

Mental Disorders and Disabilities Among Low-Income Children John Wiley & Sons

This volume constitutes the refereed proceedings of the 20th EuroSPI conference, held in Dundalk, Ireland, in June 2013. The 31 revised papers presented in this volume were carefully reviewed and selected. They are organized in topical sections on SPI Safety and Regulation Issues; SPI Lifecycle and Models; SPI Quality and Testing Issues; SPI Networks and Teams; SPI and Reference Models; SPI Implementation; Agile organisations and an agile management process group; Managing Diversity and Innovation; SPI and Measurement; Risk Management and Functional Safety Standards.

The continual rise of English as a global lingua franca has meant that English literature, both as a discipline and as a tool in ESL and EFL classrooms, is being used in varied ways outside the inner circle of English. This edited collection provides an overview of English literature education in the Asia-Pacific in global times, bringing to international attention a rich understanding of the trends, issues and challenges specific to nations within the Asia-Pacific region. Comprising contributions from Australia, China, Hong Kong, India, Indonesia, Malaysia, Philippines, Singapore and Vietnam, the collection addresses the diversity of learners in different national, cultural and teaching contexts. In doing so, it provides insights into historical and current trends in literature education, foregrounds specific issues and challenges in policymaking and implementation, presents practical matters concerning text selection, use of literature in the language classroom, innovative practices in literature education, and raises pressing and important questions about the nature, purpose and importance of literature education in global times.
