Can yoga and meditation unleash our inherent supernormal mental powers, such as telepathy, clairvoyance, and precognition? Is it really possible to perceive another person's thoughts and intentions? Influence objects with our minds? Envision future events? And is it possible that some of the superpowers described in ancient legends, science fiction, and comic books are actually real, and patiently waiting for us behind the scenes? Are we now poised for an evolutionary trigger to pull the switch and release our full potentials? Dean Radin, Director of Research at the Institute of Noetic Sciences (IONS) and bestselling author of *The Conscious Universe*, presents persuasive new experimental evidence for the existence of such phenomena. He takes us on a thrilling scientific journey and

challenges outdated assumptions that these abilities are mere superstition. Focusing on Patanjali's mysterious Yoga Sutras -- 2,000 year-old meditation practices believed to release our extraordinary powers -- Radin offers powerful evidence confirming that sometimes fact is much stranger, spookier, and more wonderful than the wildest fiction.

The chief scientist at the Institute of Noetic Sciences (IONS) turns

a critical eye toward such practices as telepathy, clairvoyance, precognition and psychokinesis. Are such powers really possible? Science says yes. According to noted scientist and bestselling author of *The Conscious Universe*, Dean Radin, magic is a natural aspect of reality, and each of us can tap into this power with diligent practice. But wait, aren't things like ESP and telepathy just wishful thinking and flights of the imagination? Not according to the author, who worked on the US government's top secret psychic espionage program known as Stargate. Radin has spent the last forty years conducting controlled experiments that demonstrate that thoughts are things, that we can sense others' emotions and intentions from a distance, that intuition is more powerful than we thought, and that we can tap into the power of intention (think *The Secret*, only on a more realistic and scientific level). These dormant powers can help us to lead more interesting and fulfilling lives. Beginning with a brief history of magic over the centuries (what was called magic two thousand years ago is turning out to be scientific fact today), a review of the scientific evidence for magic, a series of simple but effective magical techniques (the key is mental focus, something elite athletes know a lot about), Radin then offers a vision of a scientifically-informed magic and explains why magic will play a key role in frontiers of science.

The Matrix of Consciousness is a scientific look at consciousness in all its manifestations. In many of its manifestations it transcends the 3 spatial dimensions and the one temporal dimension that define our everyday reality. This book is about how new discoveries are changing how we view ourselves and

our impending deaths. In our evolving view of consciousness and reality, our death most likely means being born into a different state of cognition. This matrix of consciousness introduces a new real science, the science of reincarnation, which is incorporated into this emerging matrix as part of the information and spatial topology. The upload and download of consciousness after death and before birth is a fractal of the upload and download of information to the cloud. The old scientific model posits that reality creates consciousness. Scientists are now discovering that consciousness, in fact, shapes reality. In this cutting-edge work, author Bob Good reexamines the idea of reincarnation in the context of this changing prototype of reality. He explains the mathematical reasoning that proves consciousness is much more expansive than previously thought and that it exists in four spatial dimensions. This leads to a scientific theory of reincarnation that has major implications for the world today. *The Matrix of Consciousness* is the mathematical analysis of the structure of what happens to consciousness after death. This analysis upends traditional beliefs about death. Written with leading experts in the field of consciousness science, this proves religious belief in an afterlife but homogenizes it, because if it exists here, it exists there, and there is no "right" religion. This conclusion is reached through the scientific method, both proving an afterlife but disproving blasphemy, celibacy, and apostasy mathematically, as well as redefining Sharia and canonical law in light of this new scientific information. While its initial premise is examining reincarnation using the scientific method, its ultimate goal is redefining the matrix of consciousness and its subsequent ramifications.

"We take the greatest pleasure in presenting this latest and best work from the pen of William Walker Atkinson. It embodies the essence of years of thought, study, and experiment on the part of its author whose original research, discoveries, and writings along these lines have given him his worldwide reputation as an authority. It is his Masterpiece. A portion of its material was used in two of the author's previous works, vis., "Mental Magic," and "Mental Fascination," both of which works were published by ourselves. Both of the said works are now practically out of print, and will be withdrawn from sale by us, as they will be superseded by this newer and more complete work. This foundation material has been edited; added to; changed; improved; and corrected by the author, in accordance with his increased experience and knowledge of the subject. Obsolete matter has been replaced by entirely new material, and the work is now strictly "up-to-date". It is encyclopaedic in extent and character, every phase of the subject being considered by the author and expressed in words charged with his dynamic vitality. It contains matter that well might have been expanded into several volumes"--Foreword.

The Tree of Enchantment Hampton Roads

In *One Mind*, New York Times best-selling author Larry Dossey, M.D., proposes an inspiring view of consciousness that may reshape our destiny. Dossey's premise is that all individual minds are part of an infinite, collective dimension of consciousness he calls the One Mind. This state—which we can all access—explains phenomena as diverse as epiphanies, creative breakthroughs, premonitions of danger or disaster, near-death experiences, communication with other species and with the dead, reincarnation, the movement of herds, flocks, and schools, and remote healing. Dossey presents his theory in easily digestible, bite-sized vignettes. Through engaging stories, fascinating research, and brilliant insights from great thinkers throughout history, readers will explore the outer reaches of human consciousness, discover a new way to interpret the great mysteries of our experience, and learn how to develop the empathy necessary to engender more love, peace, and collective awareness. The result is a rich new understanding of what it means to be human and a renewed hope that we can successfully confront the challenges we face at this crossroads in human history. Even before publication *One Mind* drew praise from the finest minds of our time. It has been heralded as "landmark," "a brilliant synthesis," a "magnum opus," a "feast" of ideas, "compelling," "gripping," and "a major shift in our understanding of consciousness."

In *Faery Seership* the truths we seek can only be found within ourselves, within nature, and within our relationships to nature. At the center of the Faery Tradition lies the Tree of Enchantment: the symbol for these relationships and for the threefold life of

humanity. At each level of the tree, there are attending spirit forces that vary from beings of light to beings of shadow, from the ancestors of humanity to the architects of form and nature, from the destiny of our planet to the creation forces of the universe. The tree's roots grow through the lower world, where all life originates and the dead travel, its trunk and lower branches reach out across the middle world, where elemental forces and the four directions guide us, and its highest branches reach the into the upper world and the Star realm. Weaving together folk tradition and extensive academic research, Orion Foxwood has created an accessible, beautifully written pathway into the Old Religion of Faery Seership. Based on Appalachian traditions, Wiccan studies, Celtic oral traditions, and the Craft from Western and Northern Europe, *The Tree of Enchantment* offers the student of Faery Tradition both introductory and advanced visionary practices and authentic tools to learn to navigate the three realms of humanity. With diligence and an open heart, the reader will learn to cross The River of Blood, pass through The Gate of Awakening, and over The River of Stars.

The Conscious Universe Coronet

Is everything connected? Can we sense what's happening to loved ones thousands of miles away? Why are we sometimes certain of a caller's identity the instant the phone rings? Do intuitive hunches contain information about future events? Is it possible to perceive without the use of the ordinary senses? Many people believe that such "psychic phenomena" are rare talents or divine gifts. Others don't believe they exist at all. But the latest scientific research shows that these phenomena are both real and widespread, and are an unavoidable consequence of the

interconnected, entangled physical reality we live in. Albert Einstein called entanglement "spooky action at a distance" -- the way two objects remain connected through time and space, without communicating in any conventional way, long after their initial interaction has taken place. Could a similar entanglement of minds explain our apparent psychic abilities? Dean Radin, senior scientist at the Institute of Noetic Sciences, believes it might. In this illuminating book, Radin shows how we know that psychic phenomena such as telepathy, clairvoyance, and psychokinesis are real, based on scientific evidence from thousands of controlled lab tests. Radin surveys the origins of this research and explores, among many topics, the collective premonitions of 9/11. He reveals the physical reality behind our uncanny telepathic experiences and intuitive hunches, and he debunks the skeptical myths surrounding them. *Entangled Minds* sets the stage for a rational, scientific understanding of psychic experience.

Man and Nature in the Renaissance Hay House, Inc

The publication of Dan Brown's latest international bestseller, *The Lost Symbol*, introduced the world to a fascinating new concept: 'noetics'. Now, in this rigorously reasoned manifesto, Dean Radin, Senior Scientist at the Institute for Noetic Sciences, explains the new science of noetics and how this exciting new field of research is set to change the way we view the world forever. *The Noetic Universe* provides astonishing answers to universal questions by unveiling persuasive empirical evidence for the existence of psychic phenomena - from telepathy and clairvoyance to jinxes and prayer. Dean Radin shatters the myths that surround parapsychology, revealing the extent to which corporations,

governments and academia have embraced it, and exploring what the effects will be when - inevitably - mainstream science and society embrace it as well.

"A big, bold, brilliantly crafted page-turner with HUGE ideas that challenge every last view about how the world works. This is both a primer to understand the law of attraction and the essential book of our age." — Jack Canfield, author of *The Success Principles*(TM) and featured teacher on *The Secret*(TM) "One of the most powerful and enlightening books I have ever read. A magnificent job of presenting the hard evidence for what spiritual masters have been telling us for centuries." — Wayne W. Dyer During the past few years science and medicine have been converging with common sense, confirming a widespread belief that everything—especially the mind and the body—is far more connected than traditional physics ever allowed. The Field establishes a new biological paradigm: it proves that our body extends electromagnetically beyond ourselves and our physical body. It is within this field that we can find a remarkable new way of looking at health, sickness, memory, will, creativity, intuition, the soul, consciousness, and spirituality. The Field helps to bridge the gap that has opened up between mind and matter, between us and the cosmos. Original, well researched, and well documented by distinguished sources, this is the mind/body book for a new millennium.

A Short History of (Nearly) Everything Paranormal

Cambridge University Press

From the recovery of ancient ritual magic at the height of the Renaissance to the ignominious demise of alchemy at the dawn of the Enlightenment, Mark A. Waddell explores the rich and complex ways that premodern people made sense of their world. He describes a time when witches flew through the dark of night to feast on the flesh of unbaptized infants, magicians conversed with angels or struck pacts with demons, and astrologers cast the horoscopes of royalty. Ground-breaking discoveries changed the way that people understood the universe while, in laboratories

and coffee houses, philosophers discussed how to reconcile the scientific method with the veneration of God. This engaging, illustrated new study introduces readers to the vibrant history behind the emergence of the modern world.
