Despite the
advancements made by
Information and

Communication Technologies in several international development sectors, further evidence is needed on how mobile phone technology is reaching women, improving their learning, and providing them with new opportunities and better living conditions. Can mobile phones develop womens literacy and strengthen their capability to choose and benefit from wider educational, social and decent work opportunities that can improve their lives? Based on a cross-

analysis of nine mobile learning projects in three world regions, this publication sheds light on the extent to which mobile phones can enhance womens literacy and lead to their empowerment. The challenges encountered among the nine projects reviewed and the recommendations derived from these experiences provide a way forward for policy-makers and practitioners in the conceptualization and implementation of quality mobile learning as part of

womens human development. *Poverty Reduction and the World Bank* The Stationery Office Knowledge has been a defining focus for the curriculum studies field. In the early part of the 21st century convincing arguments were mounted that knowledge needed to be 'brought back in', both to the curriculum of schools and to the attention of curriculum researchers. This book is a result of these arguments, and what some regarded as a

'crisis' in curriculum study related to the growing emphasis on international comparisons between education systems. The book's most important contribution is to build on seminal work in the sociology and philosophy of education in order to develop new foundations for curriculum study, using the importance of 'transactions' as the context for understanding knowledge in the curriculum. The contributors build on this importance to suggest a rapprochement in the

field around the idea of curriculum knowledge as both constructed and real. This book was originally published as a special issue of The Curriculum Journal.

Academic Paper from the year 2019 in the subject Communications - Language, grade: 7, , language: English, abstract: This study examines the influence linguistic competence has in learning a second language. Language use,

be it in reading, writing, speaking, and comprehension, requires knowledge of linguistic competence. This knowledge should be tacit and implicit especially among the second language learners. This means that students should have conscious access to the principles and rules that govern the principles used on this particular language. Such idea is akin to the current study. Hence, the purpose of this study was to find out the First Language Influence on the Linguistic

Competence of the respondents. This was carried out among the one hundred sixty three (163) Grade 10 students. The linguistic competence, acculturation, and cognitive academic language proficiency theories served as the theoretical backbone. Both quantitative and qualitative methods were used. Using the purposive sampling procedure, data was collected via an adopted survey questionnaire on first language influence and an

IELTS-based test. Mean and standard deviation were observed. These were carried out further using the Spearman – Rho Correlation to measure the strength of association or correlation between the cited variables. Likewise, this test was used to measure the influence of the first language to the linguistic competence in relation to the sampling population as described by the correlation coefficients. Results revealed that the respondents' linguistic competence was slightly

correlated to the influence of first language. To address the gap, an instructional module was proposed in order to improve the linguistic competence of the respondents.

This report indicates broad support for the creation of Local Enterprise Partnerships as a way of addressing local growth. In particular the potential of LEPs to offer a

greater focus on local economic needs, and build on the affinity between business, local government and other partners at a local level is recognised. Whilst it is right that LEPs should compete at certain levels it is equally important for them to collaborate, particularly with the Regional Development Agencies, where it makes economic sense. Local Enterprise Partnerships are being introduced quickly and at a time of greatly constrained public funding. There is concern

that in the short term LEPs will need know how and powers and in some cases financial resources to make a positive difference. Government will need to be willing to devolve power to LEPs and in certain cases be willing to support LEPs at inception. If LEPs are to be a success, the Department's transition team will need to focus in three areas: retain RDA know-how, realising the full potential of RDA assets, and leveraging potential EU funding

Get a complete look into modern traffic engineering solutions
Traffic Engineering Handbook, Seventh Edition is a newly revised text that builds upon the reputation as the go-to source of essential traffic engineering solutions that this book has maintained for the past 70 years. The updated content reflects changes in key industry standards, and shines a spotlight on the needs of all users, the design of

context-sensitive roadways, and the development of more sustainable transportation solutions. Additionally, this resource features a new organizational structure that promotes a more functionally-driven, multimodal approach to planning, designing, and implementing transportation solutions. A branch of civil engineering, traffic engineering concerns the safe and efficient movement of people and goods along roadways. Traffic flow, road

geometry, sidewalks, crosswalks, cycle facilities, shared lane markings, traffic signs, traffic lights, and more—all of these elements must be considered when designing public and private sector transportation solutions. Explore the fundamental concepts of traffic engineering as they relate to operation, design, and management Access updated content that reflects changes in key industry-leading resources, such as the

Highway Capacity Manual (HCM), Manual on Uniform Traffic Control Devices (MUTCD), AASSTO Policy on Geometric Design, Highway Safety Manual (HSM), and Americans with Disabilities Act Understand the current state of the traffic engineering field Leverage revised information that homes in on the key topics most relevant to traffic engineering in today's world, such as context-sensitive roadways and sustainable transportation solutions Traffic

Engineering Handbook, Seventh Edition is an essential text for public and private sector transportation practitioners, transportation decision makers, public officials, and even upper-level undergraduate and graduate students who are studying transportation engineering.

The U.S. Social Security Administration (SSA)

provides disability benefits through the Social Security Disability Insurance (SSDI) and Supplemental Security Income (SSI) programs. To receive SSDI or SSI disability benefits, an individual must meet the statutory definition of disability, which is "the inability to engage in any substantial gainful activity [SGA] by reason of any medically determinable physical or mental impairment which can be expected to result in death or which has lasted or can be expected to last

for a continuous period of not less than 12 months." SSA uses a five-step sequential process to determine whether an adult applicant meets this definition. Functional Assessment for Adults with Disabilities examines ways to collect information about an individual's physical and mental (cognitive and noncognitive) functional abilities relevant to work requirements. This report discusses the types of information that support findings of limitations in functional abilities

relevant to work requirements, and provides findings and conclusions regarding the collection of information and assessment of functional abilities relevant to work requirements.

Investing in Skills for Inclusive Trade

World Bank Publications
This set of 62 volumes, originally published between 1951 and 1999, amalgamates a wide breadth of literature on Special Educational Needs, with a particular focus on inclusivity, class

management and curriculum theory. This collection of books from some of the leading scholars in the field provides a comprehensive overview of the subject how it has evolved over time, and will be of particular interest to students of Education and those undertaking teaching qualifications. What does literacy mean in the 21st century? How can information and communications technology (ICT)

contribute to the development of traditional literacy? And how do our traditional views of literacy need to change in response to ICT? ICT and literacy are two of the most urgent concerns for any modern educator, and in order to understand either of these phenomena adequately, one must understand them in relation to each other. ICT and Literacy provides the answers. The authors examine literacy in relation to a wide range of technology and media, especially books, video

editing, interactive multimedia, and on-line materials. With a focus on library provision as well as teaching, the authors emphasize the importance of "joined-up thinking" on the part of educators.

In the wake of the technological revolution that began in the last decades of the 20th century, labour-market demand for information-processing and other high-level cognitive and interpersonal skills have been growing substantially. Based on the results from the 39 countries and regions that participated in the 1st cycle of the Survey of

Adult Skills (PIAAC), it places special emphasis on the results from the 3rd round of this cycle, with 6 new countries collecting data in 2018-19. This report describes adults' proficiency in information-processing skills and examines how proficiency is related to education, labour-market and social outcomes.

Comprehensive Preparedness Guide (CPG) 101 provides guidelines on developing emergency operations plans (EOP). It promotes a common understanding of the fundamentals of risk-informed planning and

decision making to help planners examine a hazard or threat and produce integrated, coordinated, and synchronized plans. The goal of CPG 101 is to make the planning process routine across all phases of emergency management and for all homeland security mission areas. This Guide helps planners at all levels of government in their efforts to develop and maintain viable all-hazards, all-threats EOPs. Accomplished properly, planning provides a

methodical way to engage the whole community in thinking through the life cycle of a potential crisis, determining required capabilities, and establishing a framework for roles and responsibilities. It shapes how a community envisions and shares a desired outcome, selects effective ways to achieve it, and communicates expected results. Each jurisdiction's plans must reflect what that community will do to address its specific risks with the unique resources

it has or can obtain. National Academies Press Improvements in social indicators have been substantial over the past 25 years, but they have not been the same for those at the top and bottom of the distribution. In fact, the social indicators for those at the bottom have worsened, in some cases, substantially. This annual publication reports on World Bank activities in fiscal year 1999 and provides an overview of what the Bank is doing to help countries face the challenge of reducing

poverty. It also looks at the future of Bank assistance at the national, global and community levels. Action on these three fronts represents the beginnings of a new strategic direction, to be formulated in an implementation note after discussion of the 'World Development Report 2000/2001' on poverty is complete. This new strategic direction includes a major program of knowledge-sharing dissemination, training, and informed debate, centered around the

'World Development Report' and the 'Poverty Reduction Strategy Sourcebook'.
Educational Programs that Work Routledge
First published in 1994. This book pays tribute to the many parents and professionals who work and live with people who have learning difficulties. Enabling people with learning difficulties to take control may be achieved in a number of ways, ranging from systematic application of theory in programmes of learning and

development, to a largely intuitive response. The Editors hope that the issues and reflections raised in this book will inspire all practitioners to continue to adopt an enquiring attitude towards ways in which people with learning difficulties can exert effective control over the operation of their lives.

Functional Assessment for Adults with Disabilities

OECD Publishing

This publication is a derived version of the International Classification of Functioning, Disability and Health (ICF, WHO, 2001) designed to record characteristics of the developing child and the influence of environments surrounding the child .

This derived version of the ICF can be used by providers, consumers and

all those concerned with the health, education, and well being of children and youth. It provides a common and universal language for clinical, public health, and research applications to facilitate the documentation and measurement of health and disability in child and youth populations.-- Publisher's description.
