Science & Business Media  
This volume addresses

the cultural, technical and  
ethical motivations of the  
history of drawing of  
machines and its  
developments step by

step. First it treats drawings without any technical character; then the Renaissance with its new forms of drawing; the 18th century, with orthographic projections, immediately used by industry; the 19th century, including the applications of drawing in industry; and the 20th century, with the standardization institutions and the use of the computer. The role of historical drawings and archives in modern design is also examined. This book is of value to all

those who are interested in technical drawing, either from an artistic, from a design, or from an engineering point of view. Studio sull'evoluzione della concentrazione nel settore dei libri scolastici in Italia dal 1968 al 1976
