With each edition, ACCCN's Critical Care Nursing has built on its highly respected reputation. Its contributors aim to encourage and challenge practising critical care nurses and students to develop world-class critical care nursing skills in order to ensure delivery of the highest quality care. Endorsed by the Australian College of Critical Care Nurses (ACCCN), this 3rd edition presents the expertise of foremost critical care leaders and features the most recent evidence-based research and up-to-date advances in clinical practice, technology, procedures and standards. Expanded to reflect the universal core elements of critical care nursing practice authors, Aitken, Marshall and Chaboyer, have retained the specific information that captures the unique elements of contemporary critical care nursing in Australia, New Zealand and other similar practice environments. Structured in three sections, ACCCN's Critical Care Nursing, 3e addresses all aspects of critical care nursing, including patient care and organisational issues, while highlighting some of the unique and complex aspects of specialty critical care nursing practice, such as paediatric considerations, trauma management and organ donation. Presented in three sections: - Scope of Critical Care - Principles and Practice of Critical Care - Speciality Practice Focus on concepts that underpin practice - essential physical, psychological, social and cultural care New case studies elaborate on relevant care issues Practice tips highlight areas of care particularly relevant to daily clinical practice Learning activities support knowledge, reflective learning and understanding Additional case studies with answers available on evolve NEW chapter on postanaesthesia recovery Revised coverage on metabolic and nutritional considerations for the critically ill patient Alignment with the NEW ACCCN Standards for Practice

Sheehy's Emergency Nursing Lippincott Williams & Wilkins

International migration, particularly to Europe, has increased in the last few decades, making research on aspects of this phenomenon, including numbers, challenges, and successes, particularly vital. This Special Issue highlights this necessary and relevant area of research. It presents 37 articles including studies on diverse topics relating to the health of refugees and migrants. Most articles (28) present studies focusing on European host countries. The focus on Europe is justified if we take into consideration the increased number of refugees and migrants who have come to Europe in recent years. However, there are also articles which present studies from countries in other continents. The topics discussed in the Issue include healthcare utilization, infectious diseases, mother and child health, mental health, and chronic diseases. Finding from the included articles indicate that further development of guidelines and policies at both local and international levels is needed. Priorities must be set by encouraging and funding in-depth research that aims to evaluate the impact of existing policies and interventions. Such research will help us formulate recommendations for the development of strategies and approaches that improve and strengthen the integration of migrants and refugees into the host countries.

Covering the full age and specialty spectrum this text brings together for the first time, individual chapters from among the most respected children's nurses. This textbook is rooted in child-centred health care within a family context and draws upon best contemporary practice throughout the UK and further afield. This innovative text harnesses new design parameters in enquiry-based/problem-based learning, providing up-to-date information on a wide range of topics. In an exciting addition each chapter offers readers additional material on an Evolve website. Full Microsoft PowerPoint presentations augment the written chapters and provide extra information that includes case studies, moving image, photographs and text. Each chapter offers readers additional material on an Evolve website. Full Microsoft PowerPoint presentations augment the written chapters and provide extra information that includes case studies, moving image, photographs and text. Aims, objectives, learning outcomes, a summary box in each chapter and key points assist learning and understanding Professional conversation boxes enliven the text on the page and make it more interesting to dip into Suggestions for seminar discussion topics to help teachers Case studies help to relate theory to practice Prompts to promote reflective practice Activity boxes/suggested visits Evidence based practice boxes which highlight key research studies, annotated bibliographies including details of web-sites and full contemporary references to the evidence base Resource lists including recommended web-site addresses

Technologies and Innovation Elsevier Health Sciences

The Manchester Triage System (MTS) is the most widely used triagesystem in the UK, Europe and Australia, with tens of millions ofpatients being processed through hospital emergencydepartments. Emergency Triage is the core text for the MTS which utilises arisk averse system of prioritisation for patients in allunscheduled care settings, and as such it is an essential text forall emergency department staff using the MTS, in particular triagenurses themselves. The second edition has been revised throughout and takes in thechanges in practice introduced into MTS since the book was firstpublished. These include: Redesigned and expanded flow charts Additional charts for allergy and palpitations New practices - such as the possibility of revascularisation forpatients with stroke New discriminators, for example acute neurological deficit andsignificant respiratory history Redefinition of existing discriminators Also new to this edition is the incorporation of sections on theuse of the risk averse system in telephone triage, in settingswhere 'streaming' takes place and as an early warningscore for patients in all unscheduled care settings. The tone ofthis edition reflects the more up to date, modified approach totriage while retaining the principles of clinical prioritisation,which in the authors' words "remains a central plank ofclinical risk management in emergency care". Emergency Triage is an essential handbook for all cliniciansinvolved in unscheduled care settings such as emergency care, walkin centres, minor injury units, primary care out of hourservices.

Emergency Nursing: The Profession, The Pathway, The Practice Academic Press

Refugee, Migrant and Ethnic Minority Health BoD - Books on Demand

With over 136.3 million patient visits to the Emergency Department, emergency nurses are not only in high demand but a continuously growing segment of the nursing profession. Emergency nurses find themselves in high-risk, faced-paced, physically and emotionally demanding, and difficult situations on a constant bases, which many nurses will describe as both stressful and surprisingly, extremely fulfilling. But there are so many variables, moving pieces, and different roles when it comes to emergency nurses. How do you begin to understand or know if this is the right career for you when there is so much to know? Emergency Nurse: The Profession, the Pathway, and the Practice provides students, new nurses, and existing emergency nurses the tools and information they need to pursue and sustain a successful career in emergency healthcare. Author Jeff Solheim informs readers about the career opportunities that exist within emergency nursing, introduces nurses to the emergency department and how it differs from other healthcare settings, and explains the challenges and patient populations that emergency nurses will face on a regular basis. Filled

with fun facts, notes, and practical advice, this book is a fantastic resource for a nurse eager to learn more about emergency care.

[Theory and Application on Cognitive Factors and Risk Management](#) John Wiley & Sons

This is a concise, user-friendly orientation guide and reference for new and seasoned nurses, paramedics, preceptors, educators, management teams, and anyone else working in the triage environment. It offers guidelines covering key processes and practices triage nurses use daily. Chapters address core elements of triage such as patient point of entry, acuity scales, and “red-flag” patient presentations and how to handle them; coordination and communication with other health care team members; and documentation. The book offers practical information on triage for emergency department and urgent care settings, with useful tips for both triage orientees and preceptors. It addresses care considerations for specialized populations including geriatric and pediatric patients. The text supplies essential information on teaching and learning principles and the fostering of critical thinking skills, and covers such topics as compassion fatigue, customer service, legal concerns, core measures, and patient and staff safety. Trends in triage nursing such as electronic medical record considerations, provider in triage, and advanced triage protocols are included. Information is organized in brief, bulleted “bites” for knowledge at a glance, and Fast Facts in a Nutshell boxes reinforce key concepts. Key Features Provides essential guidance for key procedures and protocols in an easy-to-read, easy-to-access format Offers practical triage information with a focus on emergency department and urgent care settings Focuses on processes, critical thinking, and the legal aspects of triage Includes care considerations for specific patient populations Incorporates advice from seasoned emergency department nurses and triage educators

AJN Book of the Year 2016 First-Place Winner in Gerontological Nursing! “The evidence-based protocols are designed as a primary reference and are useful, substantive, and timely....The broader contributions of useful format and succinct review of the evidence make it likely that this text will continue to be the leading resource in nursing education and practice.” —The Gerontologist “As a gerontological clinical educator/research nurse, I will often use this as a reference. The format and the content are good, and the explanations of how to best use the evidence simplify the process of sifting through mountains of information to figure the best practice.” Score: 97,**** —Doody’s The newest edition of this distinguished reference in geriatric nursing delivers updated guidelines, new illustrative case studies, and the latest evidence-based protocols developed by leading researchers, educators, and practitioners in each topic area. The sixth edition includes new approaches devoted to supporting LGBTQ+ elders, persons living with dementia and their families, and older adults living with HIV. New operational strategies provide guidance in using the electronic health record, implementing improved person-centered care approaches, and maintaining age-friendly atmospheres. Using evidence derived from all levels of care, this text offers developed guidelines for improving both quality and outcomes when caring for older adults in multiple disciplines, including interprofessional team members, long-term care and other staff educators, social workers, dietitians, and physicians. Chapters provide assessment

and management principles, clinical interventions, specialty practice, and models of care. They consistently feature chapter objectives, annotated references, evidence ratings for each protocol, and resources for further investigation. Each protocol is embedded within the chapter content to provide context and detailed evidence. The protocols consistently include an overview, evidence-based assessment, intervention strategies, and a supporting case study with discussion. PowerPoint presentations and a test bank are available as instructor’s resources. New Chapters: Informational Technology: Embedding CPGs Organizational Approaches to Promote Person-Centered Care Environmental Approaches to Support Aging-Friendly Care HIV Prevention and Care for the Older Adult LGBTQ+ Perspectives Key Features: Best practices for in-patient, in-home, and long-term care settings Case studies with discussions in each chapter to illustrate application of clinical practice and related Nursing Standard of Practice Protocol The AGREE systematic method was used to evaluate each protocol and validate this book’s content Instructor’s resources including PowerPoints and a Test Bank Purchase includes digital access for use on most mobile devices and computers

[Lippincott Manual of Medical - Surgical Nursing Adaptation of Nettina: Lippincott Manual of Nursing](#) Teletriage Systems

Risk management is an interdisciplinary discipline that involves several aspects. It is absolutely necessary to make sure we manage risks in order to minimize their threats and maximize their potential. This book tries to investigate the complexity that characterizes risk management. It contains original research and application chapters from different perspectives and covers different areas such as human aspects, emergency management, cognitive factors, software engineering, and marketing. The idea of the book is to expand the reader’s consciousness to deal with problems regarding risk management.

[Healthcare Access](#) Elsevier Health Sciences

With the growth of information and focus on Healthcare Informatics, there remains an interest in case studies. In the current field of Health Informatics there is no text that uses case studies to explain the difficulties that occur. . Edited by specialists in the field of Health Informatics, the third edition of Transforming Healthcare Through Information: Case Studies builds upon the specific examples of case studies to exemplify the various phases of introducing technological advancements into healthcare institutions. The new edition includes a section on how to implement Link2care, a system that will allow caregivers of ill patients, to seek reliable and informative online information and support. In addition the cases will be framed under new sections with discussion on new topics in the area of healthcare technology such as quality data management and knowledge management. The case studies described in the third edition will benefit not only the practicing professional but also the instructor and student studying in the field of health informatics.

Pediatric Telephone Triage Guidelines, School Age (6 to 18 Years) The first and only 5-Tier Triage, Age-Specific Guidelines for School Age populations. Updated Sections that have been revised or added to the 2005 edition include: Telephone Triage 5-Tier Triage Flow Chart & Master Guideline, QA Audit, ACEP & ENA Position Papers, Standards and research on safety, root causes of error, and Five-Tier Triage. Customizable Make this manual "your own" by placing in a binder with tabs. Use it as a base set and add your facilities' preferences on colored sheets at the end of each guideline. "Growing your own" paper guidelines from scratch may take years to accomplish, may be more expensive than expected and may not produce high quality results. Evidence-Based Design: Checklists - Five standardized screening checklists help to rule out and rule in key symptoms to estimate symptom urgency and reduce mistriage (Gawande, 2009; Wachter 2015) 5 -Tier Triage Dispositions - insure patient informed consent and continuity, directing patients to where, when and why they should be seen. Consistently apprises callers of the urgency of their symptoms to help insure timely compliance. Five clearly defined, standardized dispositions (firm but flexible time frames, access sites and urgency rationale). promote reliable, consistent outcomes and clear follow up patients directives. The goal of these guidelines is "to get patients to the right place, at the right time for the right reason." Users are spared frustrating, confusing and time-consuming decision-making related to algorithm formats (ENA/ACEP, 2010) All Hours/All Access Sites - dispositions apply 24/7/365; they are not limited to office- or after- hours. Access sites are flexible for all hour options Standards-Based System to reduce common errors: inadequate data collection, miscommunications, cognitive bias (jumping to conclusions or stereotyping) and inadequacies in informed consent and continuity (IOM, 2011, Donabedian, 2003, Patel, 1996, AACN, 2012) Master GuidelineA "universal" triage tool derived from ACEP and Manchester Triage Group standards. Integrated standards in this guideline support clinicians in three ways: 1. As "contingency" or "fall back" guide (in cases where no specific guideline applies); 2. as a preemptive guideline, before selecting a more specific guideline, 3. As a training tool for new hires as a review of commonly presented symptoms (IOM, Joint Commission, 2011) Essential Features: Authoritative collaboratively developed over a two-year period by 20+member Expert Task Force. Nurse-developed, physician-reviewed. Comprehensive - Address the most common presenting symptoms, and rare, but predictable emergent symptoms -- 1,500 medical conditions. Risk Management Used in 500+ sites since 1995 without any report of errors, omissions or malpractice. User's Guide describes how to operate this reference (30 pages) Cost effective Paper-based guidelines are economical; electronic algorithms can be extremely costly
