Evolution and Human Sexual Behavior Springer

"There's lots of good news for the middle

aged...A very jolly book with clear scientific explanations."—The Telegraph David Bainbridge is a vet with a particular interest in evolutionary zoology—and he has just turned forty. As well as the usual concerns about greying hair, failing eyesight, and goldfish levels of forgetfulness, he finds himself pondering some bigger questions: have I come to the end of my productive life as a human being? And what I am now for? By looking afresh at the latest research from the fields of anthropology, neuroscience, psychology, and reproductive biology, it seems that the answers are surprisingly, reassuringly encouraging. In clear, engaging and amiable prose, Bainbridge explains the science behind the physical, mental and emotional changes men and women experience between the ages of 40 and 60, and reveals the evolutionary—and personal—benefits of middle age, which is unique to human beings and helps to explain the extraordinary success of our species. Middle Age will change the way you think about midlife, and help turn the crisis into a cause for celebration. "Bainbridge's zoological examination of

the human animal results in a study that is full of surprises...Heartening."—Sunday Times "Thought-provoking. [It] should certainly shed some new light on one's own potbellied or menopausal mid-life crisis...Fascinating."—Evening Standard

Married Love John Wiley & Sons

Over the last decade, there has been increasing debate as to whether feminism and evolutionary psychology can co-exist. Such debates often conclude with a resounding "no," often on the grounds that the former is a political movement while the latter is a field of scientific inquiry. In the midst of these debates, there has been growing dissatisfaction within the field of evolutionary psychology about the way the discipline (and others) have repeatedly shown women to be in passive roles when it comes to survival and reproduction. Evolutionary behavioral research has made significant strides in the past few decades, but continues to take for granted many theoretical assumptions that are perhaps, in light of the most recent evidence, misguided. As a result, the research community has missed important areas of research, and in some cases, will likely come to inaccurate conclusions based on existing dogma, rather than rigorous, theoretically driven research. Bias in the field of evolutionary psychology echoes the complaints against the political movement attached to academic feminisms. This is an intellectual squabble where much is at stake, including a fundamental understanding of the evolutionary significance of women's roles in culture, mothering, reproductive health and physiology, mating, female alliances, female aggression, and female intrasexual competition. Evolution's

Empress identifies women as active agents within the evolutionary process. The chapters in this volume focus on topics as diverse as female social interactions, mate competition and mating strategies, motherhood, women's health, sex differences in communication and motivation, sex discrimination, and women in literature. The volume editors bring together a diverse range of perspectives to demonstrate ways in which evolutionary approaches to human behavior have thus far been too limited. By reconsidering the role of women in evolution, this volume furthers the goal of generating dialogue between the realms of women's studies and evolutionary psychology.

Sex for Life Cengage Learning

The AIDS virus is spread by human behaviors enacted in a variety of social situations. In order to prevent further infection, we need to know more about these behaviors. This volume explores what is known about the number of people infected, risk-associated behaviors, facilitation of behavioral change, and barriers to more effective prevention efforts.

The Act of Marriage eBooks2go, Inc.

A book for married couples, from newlyweds to those married for fifty years or more, advice on how to maintain a healthy sex life.

Marriages, Families, and Relationships:

Making Choices in a Diverse Society

Cambridge University Press

"Evolutionary social science is having a renaissance. This volume showcases the empirical and theoretical advancements produced by the evolutionary study of romantic relationships. The editors assembled an international collection of contributors to trace how evolved psychological mechanisms shape strategic computation and behavior

across the lifespan of a romantic partnership. Each chapter provides an overview of historic and contemporary research on the psychological mechanisms and processes underlying initiation, maintenance, and dissolution of romantic relationships. Contributors discuss popular and cutting-edge methods for data analysis and theory development, critically analyse the state of evolutionary relationship science, and provide discerning recommendations for future research. The handbook integrates a broad range of topics (e.g., partner preference and selection, competition and conflict, jealousy and mate guarding, parenting, partner loss and divorce, and post-relationship affiliation) that are discussed alongside major sources of strategic variation in mating behavior, such as sex and gender diversity, developmental life history, neuroendocrine processes, technological advancement, and culture. Its content promises to enrich students' and established researchers' views on the current state of the discipline and should challenge a diverse cross-section of relationship scholars and clinicians to incorporate evolutionary theorizing into their professional work"--

The Forgotten Art of Love University of Chicago Press

The inspiration for countless one-liners, witty sayings, stage farces and not a few murder mysteries, marriage is more than just a relationship between two people. It's one of life's biggest adventures and a healthy marriage can be one of life's greatest gifts. But weathering the stresses and strains of married life and maintaining healthy marital bonds over a span of decades takes work, and sometimes you need help from a friendly expert. Which is where *Making Marriage Work For Dummies* comes in. Drawing

on their experiences with thirty years of marriage, during which they raised three children, as well as decades of couples counseling, experts Steven and Sue Simring show you how to build a strong, happy and long-lasting marriage. They offer priceless tips on how to deal with most problems that come up between married couples, and they offer advice on how to: Make your relationship more romantic Work out big and small differences Argue in ways that strengthen you relationship Resolve disputes over money Cope with mid-life change Handle a spouse who cheats Deal with families and in-laws Reduce stress on your marriage Understand your partner's annoying habits and quirks Balance career and family goals Seek professional help when you need it Illustrating their points with insightful, often amusing anecdotes from their own marriage and from the marriages of hundreds of couples they've counseled over the years, the Simrings explore such crucial topics as: Deciding if marriage is right for you Six common marriage myths Understanding the roots of marital problems Communicating with your partner The do's and don'ts of fair marital fighting Making marriage sexy Examining the marriage life cycle Ideas for resolving money differences Succeeding with remarriage Filled with ideas you can use now to keep your marriage as strong as the day you took your vows, this is a survival guide for everyone committed to making marriage work.

[Making Marriage Work For Dummies](#)
InterVarsity Press

Contemporary family life educators must operate in a wide range of settings and with increasingly varied populations and families. In the second edition of their successful *Family Life Education*, Powell

and Cassidy expertly expose readers to the diverse landscape of the field while laying a comprehensive, practical foundation for future family life educators. The authors, both CFLE-certified, consider the Certified Family Life Educator certification requirements of the National Council on Family Relations throughout the text. Their broad overview of the field features a blend of theory and practice, with full chapters on sexuality education, marriage education, and parent education areas that have received evaluation and certification attention. A new chapter on global trends builds awareness and appreciation of diversity through interactive classroom exercises. Each chapter in the book concludes with discussion questions, research problems, independent-study activities, and case-study suggestions, all designed to challenge readers to think for themselves.

The Mating Game Springer

This best-selling text on marriages, families, and relationships combines a rigorous scholarly and applied approach with a theme especially relevant to today's dynamic global environment: making choices in a diverse society. The authors use an engaging narrative to create a highly readable text that offers insightful perspectives on the diversity of our modern society, including different ethnic traditions and family forms. The balanced presentation discusses a variety of theoretical perspectives (e.g., family ecology, structure-functional, interaction-constructionist, family systems, biosocial), emphasizing both social structure and the importance of individual agency, choice, and decision-making. Students are encouraged to question assumptions and reconcile

conflicting ideas and values as they make informed choices in their own lives. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Authentic Human Sexuality University of Chicago Press

"During a recent day-time television talk show a young woman was informed that her husband had offered her best friend 500 dollars to have sex with him.

Needless to say, the young woman (the wife) became very angry and she (along with the talk-show host and most of the audience present) viewed this act as an egregious betrayal"--

AIDS, Sexual Behavior, and Intravenous Drug Use Granta Publications

This book brings together contributions from the natural and social sciences to examine the social and environmental dimensions of human health. *Ecologies and Politics of Health* has explicit makes substantive contributions to research and policy within these fields by addressing three key themes: the socio-political dimensions of human health; the ecological dimensions of health and vulnerability; and the intersections between the social and ecological dimensions of health.

Happy Marriage, Happy Life Forever Zondervan

Useful guide including discussions on Western sexual morality, Islamic sexual morality, Islamic view of marriage and women, beginning of sexual life, rules of marriage and the wedding night, contraceptives abortion, and human reproduction. An essential guide for every bride and groom.

Social Structure and Testosterone

University of Chicago Press

The International Handbook on the Demography of Sexuality is the first

book to specifically address the study of sexuality from a demographic perspective. Demographic research has largely paid little attention to sexuality as a whole, or sexual orientation in particular, other than in studies examining the “consequences” of sex – sexually transmitted infections or fertility. Instead, the content of this handbook explores population sexuality in order to describe the prevalence of sexual behaviors, desires, and identities, as well as their connections with other demographic outcomes. The focus is on analyzing sexuality as a demographic topic in its own right, rather than solely as a variable in studies of sexually transmitted infection or other health-related topics. In this book, both researchers with traditional demographic backgrounds, as well as those with training in other disciplines, provide an overview of the state of current research on population sexuality. These chapters provide a foundation for the development of research in the burgeoning field of the demography of sexuality.

A Christian Woman's Guide to Great Sex in Marriage New World Library
Covers major topics relevant to human relationships from a cross-cultural perspective. Examines how world cultures differ in their sexual, familial, and social habits.

Family Life Education Oxford University Press

A comprehensive survey of the evolutionary science of human sexual behavior, *Evolution and Human Sexual Behavior* invites us to imagine human sex from the vantage point of our primate cousins, in order to underscore the role of evolution in shaping all that happens, biologically and behaviorally, when romantic passions are aroused.

Social Stratification and Socioeconomic Inequality: Reproductive and interpersonal aspects of dominance and status

Univ of California Press

This is the second volume of a two volume work on biosocial approaches to social stratification and human inequality. The volume considers linkages between gender and stratification; between neurohormonal variables and status; and between health, reproduction, and social status. The contributors explore topics that environmentalists shun, and discuss how the effect of biological variables on social stratification may have evolutionary consequences.

Marriage and Morals Islam Routledge

This book has been created out of my strong desire in my heart to see marriages being happy, joyful, peaceful, and successful every day. Based on my own experience in marriage, I came to realize that there are different ways that make spouses to live happy, joyful, and successful in their marriages in all seasons no matter what circumstances or situations that might arise. It is a journey of living happily and joyfully throughout the marriage life till death. Marriage is a journey, an institution whereby it is very essential, and it is not to be taken lightly. It has to be taken seriously. When I got married on 31 July 2004, I came to realize that marriage is not just one special day of the wedding that you celebrate together with your families and friends, but rather it is a sweet journey of living joyful throughout your married life. This book has been created to make marriages happy, joyful, peaceful, and successful throughout and in all circumstances. You will learn the following aspects: Meaning of marriage My own experience in marriage How to

make your marriage joyful in all situations Relationship with families, friends, and more . . .

Contingent Lives Univ of California Press
 Pamela C. Regan's *The Mating Game: A Primer on Love, Sex, and Marriage*, Third Edition is the only introductory text about human mating relationships aimed specifically at a university audience. Encompassing a wide array of disciplines, this comprehensive review of theory and empirical research takes an integrated perspective on the fundamental human experiences of attraction and courtship; mate selection and marriage; and love and sex. Strongly grounded in methodology and research design, the book offers relevant examples and anecdotes along with ample pedagogy that will spark debate and discussion on provocative and complex topics.

Sexuality Now: Embracing Diversity
 SAGE

A psychological understanding of the problems associated with male sexuality is urgently needed, for this is one of the dimensions of the male code that has fallen the farthest and the fastest. . . In this volume, Larry A. Morris provides what we most need at this time: A scholarly examination of male (hetero)sexuality in its broadest context. Dr. Morris surveys, in turn, the biological, developmental psychological, sociocultural, and historical perspectives on male sexuality; then takes up the issues of sexual dysfunctions, sexually transmitted diseases, and the modern men's movement; and finally offers 'a new formula for the cultivation of healthy male sexuality.' The writing is very clear, the material is presented in an interesting manner, and both the author's breadth of knowledge and sense of humor come through

delightfully. . . . Dr. Morris, in this outstanding volume, lights the way for all of us as we attempt to reconstruct gender roles for a new millennium." -- from the Foreword by Ronald F. Levant
 As the traditional code of masculinity erodes, emergence of the "new real man" brings a unique challenge to the continuum of a male heterosexual development. The move toward more balanced gender roles is viewed as a must for the next millennium but the process, for many men, is wrought with the confusion and loss. Timely and clearly written, *The Male Heterosexual* explores biological, developmental, psychological, sociocultural, and historical perspectives of male sexuality. Readers are guided by the expertise and warm humor of author Larry A. Morris on a journey into a wide range of issues surrounding male sexual development. Morris skillfully exposes those elements that need to be discarded, discusses those needing to be retained, and concludes with a new formula for the cultivation of healthy male sexuality. *The Male Heterosexual* is an ideal text for courses in male or gender issues and additionally, an informative and fascinating read for academics, researchers, mental health professionals, and any sophisticated lay reader interested in a very contemporary look at this issue.

Race, Monogamy, and Other Lies They Told You, Second Edition

Thomas Nelson

This book provides a unique blend of social and biomedical sciences in the field of low fertility and reproductive health. It offers a significant contribution to understanding the determinants of low fertility mostly in East Asia, including an assessment of the effectiveness of policies that aim to raise fertility. It

introduces new analytical tools and methods and shares application of innovative approaches to analyzing cross-sectional and longitudinal survey data and macro socioeconomic data to shed light on changing mechanisms of low fertility in the context of reproductive health. The volume introduces the demographic dividend into the study of fertility, analyzes possible impact of population ageing on the amount of resources allocated to child rearing, i.e. the so called "crowding effect" in social care and public spending between the elderly and children. The

book also tests the Low Fertility Trap (LFT) hypothesis, a new important theory regarding fertility trends. The book focuses on East Asia which is numerically large but relatively under-researched with regard to issues covered in various chapters. The relevance of the volume, however, goes beyond countries in East Asia. The book breaks new grounds and reveals little known facts regarding the influence of endocrine disruptors on male fertility through falling sperm counts, the phenomenon of marital sexlessness and about the sexual behavior of adolescents in East Asia.
