The missing how-to manual for being an effective team leader

The Art of Coaching Teams is the manual you never received when you signed on to lead a team. Being a great teacher is one thing, but leading a team, or team development, is an entirely different dynamic. Your successes are public, but so are your failures—and there's no specific rubric or curriculum to give you direction. Team development is an art form, and this book is your how-to guide to doing it effectively. You'll learn the administrative tasks that keep your team on track, and you'll gain access to a wealth of downloadable tools that simplify the "getting organized" process. Just as importantly, you'll explore what it means to be the kind of leader that can bring people together to accomplish difficult tasks. You'll find practical suggestions, tools, and clear instructions for the logistics of team development as well as for building trust, developing healthy communication, and managing conflict. Inside these pages you'll find concrete guidance on: Designing agendas, making decisions, establishing effective protocols, and more Boosting your resilience, understanding and managing your emotions, and meeting your

goals Cultivating your team's emotional intelligence and dealing with cynicism Utilizing practical tools to create a customized framework for developing highly effective teams There is no universal formula for building a great team, because every team is different. Different skills, abilities, personalities, and goals make a one-size-fits-all approach ineffective at best. Instead, *The Art of Coaching Teams* provides a practical framework to help you develop your group as a whole, and keep the team moving toward their common goals.

For today's youth, life is filled with new choices, new decisions, new feelings, new perspectives, and new freedoms. During this time, teens are forming the belief systems that will influence their adult faith, and their ideas about the nature of God, the Bible, and the church. Will teen involvement in church youth programs provide them with a framework for making important choices? Will this time nurture values and encourage their emerging identities to be deeply Christian? Something wonderful can happen when you mix teenagers, the Bible, and an enthusiastic teacher together. Many teenagers are hungry to learn about the Bible, what it means, and how it can be applied to their lives. Traditionally, this type of education happens in Sunday School. Unfortunately, too many Youth Sunday School teachers are not prepared or feel inadequate when it comes to teaching teens. They do their best, but all they are doing is surviving the Sunday school hour. Help! *I Teach Youth Sunday School* offers the Sunday school teacher specific tips and hints to prepare for and care for teens. Real-life stories are mingled with information on Youth and their culture, common myths about Sunday school, a new way of

preparing the Sunday school lesson, creative teaching ideas, ways to think about growing a class, and how to reach out for new members while reaching in to old members.

"Much has been written about the historic nature of the Obama campaign. The multi-year, multi-billion dollar operation elected the nation's first black president, raised and spent more money than any other election effort in history, and built the most sophisticated voter targeting technology ever before used on a national campaign. But what is missing from these accounts is an understanding of how Obama for America organized its formidable army of 2.2 million volunteers -- over eight times the number of people who volunteered for democratic candidates in 2004. Unlike previous field campaigns that drew their power from staff, consultants, and paid canvassers, the Obama campaign's capacity came from unpaid local citizens who took responsibility for organizing their own neighborhoods months--and even years--in advance of election day. In so doing, Groundbreakers argues, the campaign enlisted citizens in the often unglamorous but

necessary work of practicing democracy. Hahrie Han and Elizabeth McKenna argue that the legacy of Obama for America is a transformation of the traditional models of field campaigning. Groundbreakers makes the case that the Obama ground game was revolutionary in two regards not captured in previous accounts. First, the campaign piloted and scaled an alternative model of field campaigning that built the power of a community at the same time that it organized it. Second, the Obama campaign changed the individuals who were a part of it, turning them into leaders. Groundbreakers proves that presidential campaigns are still about more than clicks, big data and money, and that one of the most important ways that a campaign develops its capacity is by investing in its human resources"--

#1 NEW YORK TIMES BESTSELLER • Brené Brown has taught us what it means to dare greatly, rise strong, and brave the wilderness. Now, based on new research conducted with leaders, change makers, and culture shifters, she's showing us how to put those ideas into practice so we can step up and lead. Don't miss the five-part HBO Max docuseries Brené Brown: Atlas of the Heart! NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BLOOMBERG Leadership is not about titles, status, and wielding power. A leader is anyone who takes responsibility for recognizing the potential in people and ideas, and has the courage to develop that potential. When we dare to lead, we don't pretend to have the right answers; we stay curious and ask the right questions. We don't see power as finite and hoard it; we know that power becomes infinite when we share it with others. We don't avoid difficult conversations and situations; we lean into vulnerability when it's necessary to do good work. But daring

leadership in a culture defined by scarcity, fear, and uncertainty requires skill-building around traits that are deeply and uniquely human. The irony is that we're choosing not to invest in developing the hearts and minds of leaders at the exact same time as we're scrambling to figure out what we have to offer that machines and AI can't do better and faster. What can we do better? Empathy, connection, and courage, to start. Four-time #1 New York Times bestselling author Brené Brown has spent the past two decades studying the emotions and experiences that give meaning to our lives, and the past seven years working with transformative leaders and teams spanning the globe. She found that leaders in organizations ranging from small entrepreneurial startups and family-owned businesses to nonprofits, civic organizations, and Fortune 50 companies all ask the same question: How do you cultivate braver, more daring leaders, and how do you embed the value of courage in your culture? In this new book, Brown uses research, stories, and examples to answer these questions in the no-BS style that millions of readers have come to expect and love. Brown writes, "One of the most important findings of my career is that daring leadership is a collection of four skill sets that are 100 percent teachable, observable, and measurable. It's learning and unlearning that requires brave work, tough conversations, and showing up with your whole heart. Easy? No. Because choosing courage over comfort is not always our default. Worth it? Always. We want to be brave with our lives and our work. It's why we're here." Whether you've read *Daring Greatly* and *Rising Strong* or you're new to Brené Brown's work, this book is for anyone who wants to step up and into brave leadership.

Significant progress in the development of artificial intelligence (AI) and its wider use in many interactive products are quickly

transforming further areas of our life, which results in the emergence of various new social phenomena. Many countries have been making efforts to understand these phenomena and find answers on how to put the development of artificial intelligence on the right track to support the common good of people and societies. These attempts require interdisciplinary actions, covering not only science disciplines involved in the development of artificial intelligence and human-computer interaction but also close cooperation between researchers and practitioners. For this reason, the main goal of the MIDI conference held on 9-10.12.2021 as a virtual event is to integrate two, until recently, independent fields of research in computer science: broadly understood artificial intelligence and human-technology interaction.
