*Flow Transition Design in
Hydraulic Structures*
Peachpit Press

Transitions are provided in hydraulic structures for economy and efficiency. This book covers all types of flow transitions: sub-critical to sub-critical, sub-critical to super critical, super-critical to sub-critical with hydraulic jump, and super-critical to super-critical transitions. It begins with an introduction followed by characteristics of flow in different types of transitions and procedures for hydraulic design of transitions in different structures. Different types of

appurtenances used to control flow separation and ensure uniform flow at exit of transition and diffusers are included. Examples of hydraulic design of a few typical hydraulic structures are given as well. [Ballet Dancers in Career Transition](#) Amherst Media This book studies how a modern monarchy transformed Bhutan into a parliamentary democracy. A political ethnography, it focuses on the historic elections of 2007-2008, and studies democracy and its transformational processes from the ground-up. It draws on historical as well as contemporary theories about kingship and regime change to analyse Bhutan's nascent democratic process and reflect on the direction of

political change, both at the state and local levels in the aftermath of the elections. It also presents insights into the electoral and political process by giving a firsthand account of the author's own participation in the elections and ponders on the larger political implications of this election for the region. A strong theoretical discussion situated in robust fieldwork and personal experience, this book will be an essential read for scholars and researchers of politics, especially comparative politics and political institutions, South Asian and Himalayan Studies, political sociology and social anthropology. **Navy Photographer's Mate Training Series** Cengage Learning

Tiré du site Internet <https://www.iconoclasteditions.com>: "Photographer Ari Marcopoulos immerses himself completely in the individuals, personalities, visionaries, and scenes he has photographed. Originally from the Netherlands, Marcopoulos came to New York City in 1979 where he printed photographs for Andy Warhol. He immediately became involved in the art and music scenes of the time. His rarely published photographs of Jean-Michel Basquiat from this period are perhaps the most intimate photographs ever taken of the artist. A book of this work, *Portraits from the Studio and the Street*, was released in 1988. At this time Marcopoulos turned his attention to the growing hip-hop scene in New York City, becoming friendly with and photographing popular artists such as Fab 5 Freddy and Run-DMC. His photographs were used for the cover of the Beastie Boys album *Ill Communication*. In addition, Marcopoulos has directed numerous short films and exhibited his work worldwide. His most recent series, titled *Transitions and Exits*, was featured in the 2002 Whitney Biennial.

Marcopoulos currently lives in Sonoma, California." *Pro CSS3 Animation Grafiche Damiani* This volume contains articles based on lectures given at the Workshop on Transition and Turbulence Control, hosted by the Institute for Mathematical Sciences, National University of Singapore, 80Co10 December 2004. The lecturers included 13 of the world's foremost experts in the control of transitioning and turbulent flows. The chapters cover a wide range of subjects in the broad area of flow control, and will be useful to researchers working in this area in academia, government laboratories and industry. The coverage includes control theory, passive, active and reactive methods for controlling transitional and turbulent wall-bounded flows, noise suppression and mixing enhancement of supersonic turbulent jets, compliant coatings, modern flow diagnostic systems, and swept wing instabilities."

Addressing one of the most pressing issues of the Lebanese Civil War

(1975-1990) that is still unresolved almost 30 years later, this book adopts a political, sociological, and anthropological approach to look at periods of transition from conflict to peace in Lebanon. Inducing a set of questions about the social and political system, the post-conflict state has been pushing for a politics of amnesty and amnesia. The case study delves into the notion of transition from conflict to peace in Lebanon by looking in the case of the estimated 17,000 people who disappeared during the Civil War. Using the concept of liminality to understand the evolution of the issue over the years, the book follows the trajectory of the relatives of the missing, who have formed a *communitas* – a group sharing strong feelings of comradeship and brother/sisterhood by virtue of finding themselves in the same situation. Offering a novel way of looking at transitions, the book is a significant contribution to peace studies, and it will be an interest of students and academics working in human rights, political science, and the Middle East disciplines.

Good agroecological practices are indispensable for the development of sustainable agriculture. In this book, principles, diversity and applications of agroecological practices for a range of systems are presented, transforming scientific research and participatory knowledge of production into practical application. It illustrates a broad range of research and teaching being used within the farming community to demonstrate best practice and current state-of-play within the field.

Agroecological methods used in crop farming, grass-based livestock farming, fish production, and other complex farming systems are discussed. Conclusions are drawn from studies to provide an outlook on future trends of agroecological practices and on policies supporting implementation. Due to emphasis on real-life application, it is relevant not only to students of the agricultural sciences and public policy, but also to researchers, stakeholders and policy makers involved in the

development of sustainable agriculture. *NASA Technical Paper* Cambridge Scholars Publishing

Global Power Shifts and Strategic Transition in Asia John Wiley & Sons

In an era of intensifying globalization and transnational connectivity, the dynamics of cultural production and the very notion of creativity are in transition. Exploring creative practices in various settings, the book does not only call attention to the spread of modernist discourses of creativity, from the colonial era to the current obsession with 'innovation' in neo-liberal capitalist cultural politics, but also to the less visible practices of copying, recycling and reproduction that occur as part and parcel of creative improvisation.

This anthology investigates the

interconnections between painting, photography, and the digital in contemporary art practices. It brings together 15 contributors, including internationally acclaimed artists Matt Saunders, Clare Strand, Elias Wessel, and Dan Hays, to write about a diverse range of art-making involving medium cross-over. Topics discussed here include reflections on the painted-on-photograph, reordering photographs into paintings, digital collage, printing digital landscapes onto recycled electronic media, viewer immersion in painted virtual reality (VR) worlds, photography created from paint, and the "truth" of the mediums. Underpinned by significant theoretical concepts, the volume provides unique insights into explorations of the mediums' interconnectivity, which questions the position of the traditional genres. As such, this book is essential reading for practitioners, theorists, and students researching the nature of painting, photography, and digital art practices today.

This book provides an

important compilation and synthesis of current work in transition to school research. The book focuses strongly on the theoretical underpinnings of research in transition to school. It outlines key theoretical positions and connects those to the implications for policy and practice, thereby challenging readers to re-conceptualize their understandings, expectations and perceptions of transition to school. The exploration of this range of theoretical perspectives and the application of these to a wide range of research and research contexts makes this book an important and innovative contribution to the scholarship of transition to school research. A substantial part of the book is devoted to detailed examples of transition to school practice. These chapters provide innovative examples of evidence-based practice and contribute in turn, to practice-based evidence. The book is also devoted to considering policy issues and implications related to the transition to school. It records a genuine, collaborative effort to bring together a range of perspectives into

a Transition to School Position Statement that will inform ongoing research, practice and policy. The collaborative, research, policy and practice based development of this position statement represents a world-first.

The random movement of the transition point on a 10 degree cone at a free-stream Mach number of 3.12 was investigated by means of a large number high-speed schlieren photographs. The distribution functions which statistically define the transition-point location were determined for a range of test-section Reynolds number and two levels of free-stream turbulence intensity. The intensity was varied by changing tunnel settling-chamber configurations. Temperature-recovery-factor distributions were also obtained.

This year we celebrated another anniversary: after 20 years of SAFECOMP in 1999, this was the 20 SAFECOMP since its inauguration in 1979. This series of events focuses on critical computer applications. It is intended

to be a platform for knowledge transfer between academia, industry, and research institutions. Papers are solicited on all aspects of computer systems in which safety, reliability, and security (applied to safety in terms of integrity and availability) are of importance. The 20th SAFECOMP tried to cover new grounds, both thematically and geographically. The previous 19 SAFECOMPs were held in Austria (1989, 1996), France (1987, 1999), Germany (1979, 1988, 1998), Great Britain (1983, 1986, 1990, 1997), Italy (1985, 1995), Norway (1991), Poland (1993), Switzerland (1992), The Netherlands (2000), and in the USA (1981, 1992), whereas the 20 was held in Hungary. Authors from 13 countries responded to the Call for Papers, and 10 countries were represented in the final program. The proceedings include 20 papers plus 3 invited papers, covering the areas Reliability Assessment and Security, Safety Case and Safety Analysis, Testing, Formal Methods, Control Systems, and this year covering new grounds with a special emphasis on Human Machine

Interface, Components off the Shelf, and Medical Systems.

The Magnificent Exit is a book about transitional leadership. Through personal stories, professional case studies, biblical exegesis, character studies, and spiritual insights, Neil Hart introduces the reader to a transformative principle of leadership: the best leaders know when to leave, which is far earlier than usually thought. Here are just a few of the key principles explored in the book: The inertia created by poor leadership handoffs is one of the biggest leadership problems. Jesus turned the task of building the church over to others and then left the scene, serving as an example of transitional leadership. God's vision for us as leaders is to think generationally. The best leaders envision their organizations without them in the picture. The best leaders know how to avoid "Founder President Syndrome." A good transition involves both

selecting the right successor and not waiting too long to leave. Key quote: "Organizations should exist for people, and people for the mission and kingdom of God. Leaders exist to serve people in that mission, to envision them, to encourage them, to course-correct, and to release them."
