In the 1830s, when a brave and curious girl named Elizabeth Blackwell was growing up, women were supposed to be wives and mothers.

Some women could be

teachers or seamstresses, but career options were few. Certainly no women were doctors.

But Elizabeth refused to accept the common beliefs that women weren't smart enough to be doctors, or that they were too weak for such hard work. And she would not take no for an answer.

Although she faced much opposition, she worked hard and finally—when she graduated from medical school and

went on to have a brilliant career—proved her detractors

wrong. This inspiring story of the first female doctor
