A cross-section of the American experience on D-Day Unique perspective from the regimental level that also integrates strategic and tactical considerations Stories of largely forgotten acts of valor G. H. Bennett collects oral histories from the soldiers of three American regiments and weaves them into an intimate account of the D-Day invasion of June 6, 1944. Widely scattered during its drop into Normandy, the 507th Parachute Infantry Regiment (82nd Airborne Division) stopped the advance of an SS division. The untested 116th Infantry Regiment (29th Infantry Division) landed on bloody Omaha Beach, where it suffered more casualties than any other regiment that day. Meanwhile, the 22nd Infantry Regiment (4th Infantry Division) easily waded

ashore on Utah Beach but faced savage fighting as it moved inland.

Discover how humans created their world from the objects they left behind - from the US Constitution to the first iPhone - in DK's latest history book. From the beginning of human history, the one thing that has defined us is our talent for making things, from basic technology and everyday objects, such as bowls and hand axes, to high-tech inventions, such as supersonic aircraft, smart devices, and Mars rovers. Objects speak volumes about a civilization, telling us how our ancestors lived - as well as what they believed in and valued. A bronze cat mummy shows us how highly the ancient Egyptians valued their feline companions, while a mechanical tiger toy tells the story of rising tensions between an Indian sultan and European colonizers. With stunning, exclusive photography, *History of the World in 1000 Objects* shows you the objects that our ancestors treasured -

from the jewelry worn by the Mesopotamians to the prized ritual vessels used by the people of the Shang Dynasty - and gives you insight into what gave each culture its own identity. From astrolabes and airplanes to vacuum cleaners and X-rays, DK uses its hallmark visual style to weave the extraordinary legacy of our creativity into a unique view of world history that will change the way you see the objects all around us.

Roman sketches, op. 7 Edition Peters

"Granados was among the leading pianists of his time, and his eloquence at the keyboard inspired critics to dub him the "poet of the piano." In *Enrique Granados: Poet of the Piano*, Walter Aaron Clark offers the first substantive study in English of this virtuoso pianist, composer, and music pedagogue. While providing detailed analyses of his major works for voice, piano, and the stage, Clark argues that Granados's art represented a unifying

presence on the cultural landscape of Spain during a period of imperial decline, political unrest, and economic transformation. Drawing on newly discovered documents, Clark explores the cultural spheres in which Granados moved, particularly of Castile and Catalonia. Granados's best-known music was inspired by the art of Francisco Goya, especially the *Goyescas* suite for solo piano that became the basis for the opera. These pieces evoked the colorful and dramatic world that Goya inhabited and depicted in his art. Granados's fascination with Goya's Madrid set him apart from fellow nationalists Albeniz and Falla, who drew their principal inspiration from Andalusia. Though he was resolutely apolitical, Granados's attraction to Castile antagonized some Catalan nationalists, who resented Castilian domination. Yet, Granados also made important contributions to Catalan musical theater and was a prominent figure in the modernist movement in Barcelona."

Shed a spiritual light on some of the biggest problems facing people today: the need to put the role of money in a proper perspective and to solve financial problems. Elmer Towns states at the outset that this is not the primary purpose of fasting and prayer. Instead, it is all about knowing God. It is not about withdrawing prayer on an as-needed basis from some spiritual ATM kiosk. It is about meditation, studying the Scriptures, and communing with God. When we fast and pray in faith, asking for God's help and provision, He begins to teach us how to become good stewards of what He has provided. Chapter topics include "Fasting to Learn Stewardship," "Why We Have Money Problems," and "A Faith Approach to Fasting for Money." Once we

understand why we struggle with money problems, we can do something about it with this practical step-by-step guide.

Explore the WWII history of the company that later became a part of Boeing and made more aircraft from 1938 to 1944 than any other company in the United States. During World War II, Los

Angeles was the ultimate boom town. By the end of the war, the L.A. area had produced 17 percent of all of America's war needs. North American Aviation, Inc. (NAA), operating out of their main Inglewood, California, plant, which is south of and adjacent to the city, was a key player in that work. From 1938 to 1944, NAA built over 40,000 aircraft, more than any other company in the United States. The bulk of them were of three iconic types designed by NAA: - The P-51 Mustang, arguably the best fighter of WWII. - B-25 Mitchell medium bombers, which saw worldwide combat. - Two-seat military pilot trainers, such as the AT-6 Texan. This is a fascinating story of a remarkable time in aviation history, when American businesses helped fund the arsenal of democracy that helped defeat the Axis powers. Warbird Factory tells this story with over 200 photographs, many of which come directly from the NAA/Boeing archives, where they have resided since WWII. This is an essential book for anyone interested in warbirds, aviation, Boeing/NAA, WWII, and/or the history of Southern California!

Before World War II most Americans did not believe that the average woman could fly professionally, but during the war more than a thousand women pilots proved them wrong. These were the Women Airforce Service Pilots (WASPs), who served as military flyers on the home front. In March 1944 one of them, Ann Baumgartner, was assigned to the Fighter Flight Test Branch at Wright Field in Dayton, Ohio. There she would make history as the only woman to test-fly experimental planes during the war and the first woman to fly a jet. A WASP among Eagles is the first-person story of how Baumgartner learned to fly, trained as a WASP, and became one of the earliest jet-age pioneers. Flying such planes as the Curtiss A-25 Helldiver, the Lockheed P-38, and the B-29 Superfortress, she was the first woman to participate in a host of experiments, including in-air refueling and flying the first fighter equipped with a pressurized cockpit. But in evaluating the long-awaited turbojet-powered Bell YP-59A, she set a "first" record that would remain unchallenged for ten years.

I Will Survive is the story of Gloria Gaynor, America's "Queen of Disco." It is the story of riches and fame, despair, and finally salvation. Her meteoric rise to stardom in the mid-1970s was nothing short of phenomenal, and hits poured forth that pushed her to the top of the charts, including "Honey Bee," "I Got You Under My Skin," "Never Can Say Goodbye," and the song that has immortalized her, "I Will Survive," which became a #1 international gold seller. With that song, Gloria heralded the international rise of disco that became synonymous with a way of life in the fast lane - the sweaty bodies at Studio 54, the lines of cocaine, the indescribable feeling that you could always be at the top of your game and never come down. But down she came after her early stardom, and problems followed in the wake, including the death of her mother, whose love had anchored the young singer, as well as constant battles with weight, drugs, and alcohol. While her fans always imagined her to be rich, her personal finances collapsed due to poor management; and while many envied her, she felt completely empty inside. In the early 1980s, sustained by her marriage to music publisher Linwood Simon, Gloria took three years off and reflected upon her life. She visited churches and revisited her mother's old Bible. Discovering the world of gospel, she made a commitment to Christ that sustains her to this day.

Poetry. "I am spending my 39th year practicing uncreativity. On Friday, September 1, 2000, I began retyping the day's NEW YORK

TIMES word for word, letter for letter, from the upper left hand corner to the lower right hand corner, page by page." With these words, Kenneth Goldsmith embarked upon a project which he termed "uncreative writing", that is: uncreativity as a constraint-based process; uncreativity as a creative practice. By typing page upon page, making no distinction between article, editorial and advertisement, disregarding all typographic and graphical treatments, Goldsmith levels the daily newspaper. DAY is a monument to the ephemeral, comprised of yesterday's news, a fleeting moment concretized, captured, then reframed into the discourse of literature. "When I reach 40, I hope to have cleansed myself of all creativity"-Kenneth Goldsmith.

Songs Made Famous by Elton John

There is an unprecedented surge of interest in and the desire of producing gaselectric hybrid (HEVs) and all-electric vehicles (EVs) by the governments and public in the industrialized countries. This surge of interest and desire is attributed to several factors relating to the life-threatening air pollution in many parts of the world, the high petroleum price, conflicts in oil producing Middle East regions and the alarming trend of global warming due to rapid increase of greenhouse gas emissions by all sources, including those from transportation. Full electric vehicles use no gasoline; they are powered by a high-voltage electric motor and battery pack. All the elements are now in place to tackle fairly complex static rigid body problems. Battery electric vehicles do not have an internal combustion engine and use no on-board gasoline. Instead, they use a high-voltage electric motor, which gets its power from a high-voltage battery pack. The primary benefit of BEVs is that they completely eliminate carbon dioxide

(CO₂) and other emissions directly from the vehicle. Therefore, it is vital to raise global ecological awareness and wider public education regarding ecology. Goal of this book is to bring closer to the readers new drive technologies that are intended to environment and nature protection. New Generation of Electric Vehicles presents modern technique achievements and technologies applied in the implementation of electric vehicles. Special attention was paid to energy efficiency of electrical vehicles. Also today's trends, mathematical models and computer design elements of future cars are presented.

Basic Principles in Pianoforte Playing

Now a byword for beauty, Verdi's operas were far from universally acclaimed when they reached London in the second half of the nineteenth century. Why did some critics react so harshly? Who were they and what biases and prejudices animated them? When did their antagonistic attitude change? And why did opera managers continue to produce Verdi's operas, in spite of their alleged worthlessness? Massimo Zicari's Verdi in Victorian London reconstructs the reception of Verdi's operas in London from 1844, when a first critical account was published in the pages of *The Athenaeum*, to 1901, when Verdi's death received extensive tribute in *The Musical Times*. In the 1840s, certain London journalists were positively hostile towards the most talked-about representative of Italian opera, only to change their tune in the years to come. The supercilious critic of *The Athenaeum*, Henry Fothergill Chorley, declared that Verdi's melodies were worn, hackneyed and meaningless, his harmonies and progressions crude, his orchestration noisy. The scribes of *The Times*, *The Musical World*, *The Illustrated London News*, and

The Musical Times all contributed to the critical hubbub. Yet by the 1850s, Victorian critics, however grudging, could neither deny nor ignore the popularity of Verdi's operas. Over the final three decades of the nineteenth century, moreover, London's musical milieu underwent changes of great magnitude, shifting the manner in which Verdi was conceptualized and making room for the powerful influence of Wagner. Nostalgic commentators began to lament the sad state of the Land of Song, referring to the now departed "palmy days of Italian opera." Zicari charts this entire cultural constellation. *Verdi in Victorian London* is required reading for both academics and opera aficionados. Music specialists will value a historical reconstruction that stems from a large body of first-hand source material, while Verdi lovers and Italian opera addicts will enjoy vivid analysis free from technical jargon. For students, scholars and plain readers alike, this book is an illuminating addition to the study of music reception.
