Handbook of Consumer Behavior, Tourism, and the Internet Springer

In 2007 the IS wo- shop (Information Security) was added to try covering also the speci?c issues of security in complex Internet-based information systems.

The Mobile Audience Emerald Group Publishing

The four-volume set LNCS 8012, 8013, 8014 and 8015 constitutes the proceedings of the Second International Conference on Design, User Experience, and Usability, DUXU 2013, held as part of the 15th International Conference on Human-Computer Interaction, HCII 2013, held in Las Vegas, USA in July 2013, jointly with 12 other thematically similar conferences. The total of 1666 papers and 303 posters presented at the HCII 2013 conferences was carefully reviewed and selected from 5210 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of Human-Computer Interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas. The total of 282 contributions included in the DUXU proceedings were carefully reviewed and selected for inclusion in this four-volume set. The 83 papers included in this volume are organized in the following topical sections: DUXU in business and the enterprise, designing for the Web experience; product design; information and knowledge design and visualisation; and mobile applications and services.

Information and Communication Technologies in Tourism 1998 IGI Global

This volume is the first part of a four-volume set (CCIS 190, CCIS 191, CCIS 192, CCIS 193), which constitutes the refereed proceedings of the First International Conference on Computing and Communications, ACC 2011, held in Kochi, India, in July 2011. The 68 revised full papers presented in this volume were carefully reviewed and selected from a large number of submissions. The papers are organized in topical sections on ad hoc networks; advanced micro architecture techniques; autonomic and context-aware computing; bioinformatics and bio-computing; cloud, cluster, grid and P2P computing; cognitive radio and cognitive networks; cyber forensics; database and information systems.

Models and Analysis for Distributed Systems John Wiley & Sons

eTourism Case Studies bridges the gap in contemporary literature by carefully examining marketing and management issues of many international companies that have successfully implemented eTourism solutions. Divided into six sections this book explores the newest developments in this field, introducing and discussing emerging trends, approaches, models and paradigms, providing visions for the future of eTourism and supporting discussion and elaboration with the help of thorough pedagogic aids. With contributions from leading global experts

both from the industry and academia, each case follows a rigid structure, with features such as bulleted summaries and review questions, as well as each section having its own thorough introduction and conclusion written by the editors, highlighting the key issues and theories. This is the first book of its kind to bring together cases highlighting best practice and methods for exploiting ICT in the tourism industry, from international market leaders.

Hospitality, Travel, and Tourism: Concepts, Methodologies, Tools, and Applications Rodopi

This book constitutes the refereed proceedings of the First German Conference on Multiagent System Technologies, MATES 2003, held in Erfurt, Germany, in September 2003. The 18 revised full papers presented together with an invited paper were carefully reviewed and selected from 49 submissions. The papers are organized in topical sections on engineering agent-based systems, systems and applications, models and architectures, the semantic Web and interoperability, and collaboration and negotiation.

Advances in Computing and Communications, Part I Springer

Technological advances in the field of IT lead to the creation of new programs intended to merge the advantages of desktop-based programs with the advantages of Web-based programs in order to increase user accessibility and provide effective computer performance. Frameworks, Methodologies, and Tools for Developing Rich Internet Applications presents current research and analysis on the use of JavaScript and software development to establish new programs intended for the Web. With an in-depth look at computer and Web programming, this publication emphasizes the benefits and dynamic qualities of these emerging technologies. This book is an essential reference source for academicians, researchers, students, practitioners, and professionals interested in understanding and applying the advances in the combined fields of Web engineering and desktop programming in order to increase computer users' visual experience and interactivity.

Generative Programming and Component Engineering Springer

Designed to show experienced developers how to become power developers with BEA WebLogic Covers BEA WebLogic Server version 8.1 and earlier versions A perfect companion to the bestselling book, Mastering Enterprise JavaBeans, Second Edition (0471-41711-4) Companion Web site includes technology updates and links to related sites

Web Engineering Elsevier

Grid and cooperative computing has emerged as a new frontier of information tech- logy. It aims to share and coordinate distributed and heterogeneous network resources for better performance and functionality that can otherwise not be achieved. This volume contains the papers presented at the 2nd International Workshop on Grid and Cooperative Computing, GCC 2003, which was held in Shanghai, P.R. China, during December 7-10, 2003. GCC is designed to serve as a forum to present current and future work as well as to exchange research ideas among researchers, developers, practitioners, and

users in Grid computing, Web services and cooperative computing, including theory and applications. For this workshop, we received over 550 paper submissions from 22 countries and regions. All the papers were peer-reviewed in depth and qualitatively graded on their relevance, originality, significance, presentation, and the overall appropriateness of their acceptance. Any concerns raised were discussed by the program committee. The organizing committee selected 176 papers for conference presentation (full papers) and 173 submissions for poster presentation (short papers). The papers included herein represent the forefront of research from China, USA, UK, Canada, Switzerland, Japan, Australia, India, Korea, Singapore, Brazil, Norway, Greece, Iran, Turkey, Oman, Pakistan and other countries. More than 600 attendees participated in the technical section and the exhibition of the workshop.

Handbook of Research on Global Information Technology Management in the Digital Economy IGI Global

The Online Hotel Booking System was developed to allow customers to use a web browser to book a hotel, change the booking details, cancel the booking, change the personal profile, view the booking history, or view the hotel information through a GUI (graphical user interface). The system is implemented in PHP (Hypertext Preprocessor) and HTML (Hyper Text Markup Language).

Collaboration in Tourism Businesses and Destinations

Prentice Hall Professional

User Interface Design and Evaluation provides an overview of the user-centered design field. It illustrates the benefits of a user-centered approach to the design of software, computer systems, and websites. The book provides clear and practical discussions of requirements gathering, developing interaction design from user requirements, and user interface evaluation. The book's coverage includes established HCI topics—for example, visibility, affordance, feedback, metaphors, mental models, and the like—combined with practical guidelines for contemporary designs and current trends, which makes for a winning combination. It provides a clear presentation of ideas, illustrations of concepts, using real-world applications. This book will help readers develop all the skills necessary for iterative user-centered design, and provides a firm foundation for user interface design and evaluation on which to build. It is ideal for seasoned professionals in user interface design and usability engineering (looking for new tools with which to expand their knowledge); new people who enter the HCI field with no prior educational experience; and software developers, web application developers, and information appliance designers who need to know more about interaction design and evaluation. Co-published by the Open University, UK. Covers the design of graphical user interfaces, web sites, and interfaces for embedded systems. Full color production, with activities, projects, hundreds of illustrations, and industrial applications.

Streamline your vacation to Europe's most enchanting city with DK Eyewitness Travel Guide: Top 10 Prague. Organized into easy-to-follow, illustrated itineraries, this Top 10 travel guide for Prague takes you to the best spots in the city, including its top 10 restaurants and cafes, the top 10 haunted sights in the medieval city, and top 10 sights in the Jewish Quarter. All of the must-see destinations, including historic Prague Castle, are featured in this guide.

Grid and Cooperative Computing Kogan Page Publishers

An integrated approach to investigate, create, and propose a model for the value creation of cultural products is essential in maintaining its connection with e-relationship marketing; this

examination is important in recognizing a common perspective. The Handbook of Research on Management of Cultural Products: E-Relationship Marketing and Accessibility Perspectives examines the potential value of cultural products and how the support of new technologies can enable non-conventional and social-media marketing relationships. This book aims to highlight an emerging subject area in the field of financial management, management of value creation, and marketing that will be essential for scientists, researchers, and practitioners.

What's new in Visual FoxPro 7.0? Lotsa stuff!!!!!! Read All About It Here! Visual FoxPro 7.0 has been called the most revolutionary upgrade since 3.0. Whether you agree or not, there's a lot of new stuff in the latest to appear from the Fox labs in Redmond - and you won't find a better, more concise guide of what's new, and how to use it, than in this compendium put together by three of the finest Fox developers on the planet.

What's New in Visual FoxPro 7.0 Springer Science & Business Media

This book constitutes the refereed proceedings of the 13th International Conference on Web Engineering, ICWE 2013, held in Aalborg, Denmark, in July 2013. The 21 full research papers, 4 industry papers, and 11 short papers presented were carefully reviewed and selected from 92 submissions. The scientific program was completed with 7 workshops, 6 demonstrations and posters. The papers cover a wide spectrum of topics, such as, among others: web mining and knowledge extraction, semantic and linked data management, crawling and web research, model-driven web engineering, component-based web engineering, Rich Internet Applications (RIAs) and client-side programming, web services, and end-user development.

Architecting Web Services John Wiley & Sons

Following the migration of workflows, data, and communication to the Cloud and other Internet-based frameworks, interaction over the Web has become ever more commonplace. As with any social situation, there are rules and consequences to actions within a virtual environment. *Cyber Behavior: Concepts, Methodologies, Tools, and Applications* explores the role of cyberspace in modern communication and interaction, including considerations of ethics, crime, security, and education. With chapters on a variety of topics and concerns inherent to a contemporary networked society, this multi-volume work will be of particular interest to students and academicians, as well as software developers, computer scientists, and specialists in the field of Information Technologies.

Intelligent Analytics With Advanced Multi-Industry Applications IGI Global

This book constitutes the refereed proceedings of the 14th International Conference on Electronic Commerce and Web Technologies (EC-Web) held in Prague, Czech Republic, in August 2013. In 2013, EC-Web focused on recommender systems, semantic e-business, business services and process management, and agent-based e-commerce. The 13 full and 6 short papers accepted for EC-Web, selected from 43 submissions, were carefully reviewed based on their originality, quality, relevance, and presentation.

Tourism Informatics IGI Global

This book constitutes the refereed proceedings of the 17th International Conference on Web Engineering, ICWE 2017, held in Rome, Italy, in June 2017. The 20 full research papers and 12 short papers presented together with 6 application papers, 6 demonstration papers, and 6 contributions to the PhD Symposium, were carefully reviewed and selected from 139 submissions. The papers cover research areas such as Web

application modeling and engineering, human computation and crowdsourcing applications, Web applications composition and mashup, Social Web applications, Semantic Web applications, Web of Things applications, and big data.

Strategic and Pragmatic E-Business: Implications for Future Business Practices Springer Science & Business Media

Business transactions and partnerships across borders have become easier than ever due to globalization and global digital connectivity. As part of this shift in the business sphere, managers, executives, and strategists across industries must acclimate themselves with the challenges and opportunities for conducting business globally. *International Business: Concepts, Methodologies, Tools, and Applications* presents the latest research innovations focusing on cross-cultural communications and training, international relations, multinational enterprises, outsourcing, international business strategies, and competitive advantage in the global marketplace. This publication is an exhaustive multi-volume work essential to academic and corporate libraries who serve researchers, scholars, business executives and professionals, and graduate-level business students.

E-Commerce, and Web Technologies Springer

Make the most of your online business resources The growing acceptance and use of the Internet as an increasingly valuable travel tool has tourism and hospitality businesses taking a critical look at their business-to-customer online environments while pondering such questions as, "How do I get people to visit my Web site?" "Is my Web site attracting the 'right' kind of e-consumers?" and "How do I turn browsers into buyers?" The *Handbook of Consumer Behavior, Tourism, and the Internet* analyzes the latest strategies involving Internet business applications that will help you attract—and keep—online travel customers. Researchers from the United States, Europe, and Asia present the latest findings you need to make the right decisions regarding long-term e-commerce development and planning. The

Handbook of Consumer Behavior, Tourism, and the Internet examines vital issues affecting the travel and tourism industry from an online perspective. This book analyzes the latest theory and research on general online buyer characteristics, the differences between online and offline consumer behavior, the differences between broadband and narrowband users, the online search process, quality and perception of lodging brands, and Web site design, maintenance, and development. Each section of the book includes a model/diagram that serves as an overview of the topic, followed by a thorough discussion on the topic from several sources. Each section ends with commentary on the areas where future research is needed. The book's contributors use a variety of research methodologies ranging from qualitative data analyses using artificial neural network analysis, to experimental design, non-parametric statistical tests, and structural equation modeling. Topics examined in the *Handbook of Consumer Behavior, Tourism, and the Internet* include: the need for businesses to use internal examinations to determine and meet online consumer needs the emerging field of e-complaint behavior—consumers taking to the Web to voice complaints about travel services how to use e-tools to measure guest satisfaction how to measure consumer reaction to Web-based technology the Internet's impact on decision making for travel products and how to use e-mail marketing, electronic customer relationship management (eCRM), Web positioning, and search engine placement The *Handbook of Consumer Behavior, Tourism, and the Internet* is equally valuable as a classroom resource or professional reference, providing up-to-date material on Internet applications and their impact on consumers and e-commerce.

Web Engineering Springer

The practical guide to C# .NET development for experienced programmers. Running case study covers the entire .NET development process. .NET attributes, collections, threading, security, versioning, remoting, and more.
