BRADLEY

Italy: Northern Italy, including Leghorn,

Florence, Ravenna, and routes through Switzerland and Austria. With 30 maps, 40 plans, and a panorama. 13th

remodelled ed. 1906

Routledge

This is the first study to examine the rise and fall of a medieval religious group, the Order of Apostles, that began with orthodox support but ended in the fires of heresy. Originating in 1260 in Parma the group was founded by Gerard Segarelli who believed that a life of apostolic poverty was the true path of Christian devotion. Segarelli was initially supported by the Church but as his cohort grew in number and fame he was

charged with heresy by the powerful Franciscans, was tried, and burnt as a heretic. The Order's control was assumed by Fra Dolcino who led the Apostles into direct opposition to the Roman Church and was himself executed in 1307. This is an important study presenting new findings in the history of medieval heresy, as well as placing the Order of Apostles within the larger context of political, economic and social history. By examining the rise and fall of the Apostles Pierce

shows the dramatic consequences of the transformation of European society during the high Middle Ages. Die Eidgenössischen Abschiede Bloomsbury Publishing
The Routledge Handbook of Archaeoethanatology spans the gap between archaeology and biological anthropology, the field and laboratory, and between francophone and anglophone funerary archaeological approaches to the remains of the dead and the understanding of

societies, past and present. Interest in archaeoethanatology has grown considerably in recent years in English-language scholarship. This timely publication moves away from anecdotal case studies to offer syntheses of archaeoethanatomical approaches with an eye to higher-level inferences about funerary behaviour and its meaning in the past. Written by francophone scholars who have contributed to the development of the field and anglophone scholars inspired by the approach,

this volume offers detailed insight into the background and development of archaeoethanatology, its theory, methods, applications, and its most recent advances, with a lexicon of related vocabulary. This volume is a key source for archaeo-anthropologists and bioarchaeologists. It will benefit researchers, lecturers, practitioners and students in biological anthropology, archaeology, taphonomy and forensic science. Given the interdisciplinary

nature of these disciplines, and the emphasis placed on analysis in situ, this book will also be of interest to specialists in entomology, (micro)biology and soil science.
