Best remembered as the author of Joseph Andrews (1742), Tom Jones (1749) and Amelia (1751), Henry Fielding was one of the most important

pioneering English novelists of the eighteenth century, and his works continue to occupy a central place in the literary canon. During

the 1730s he was the most dominant playwright in London since John Dryden; and in his official capacity as a magistrate, he addressed serious social problems and invented the modern metropolitan police. This reference book makes essential information available to readers interested in Fielding, his life, and his works. The volume is organized in sections devoted to such topics as Fielding's residences; his family members and household; historical persons,

including authors who influenced him; his works; themes and topics important to his writings; and characters in his plays and prose fiction. Each section contains numerous entries on particular items, and many entries provide brief bibliographical information. While the sectional organization of the volume invites the reader to explore broad areas of interest, a thorough index provides convenient alphabetical access to the entries. A brief introductory essay

and chronology begin the volume, and the book concludes with an extensive bibliography. Bradshaw's continental [afterw.] monthly continental railway, steam navigation & conveyance guide. West Nile Virus—Mad Cow Disease—HIV/AIDS—Hantavirus—Lyme Disease ... and a new strain of Salmonella. Such modern epidemics have emerged over the past few decades as mysterious, yet significant risks to human health. These "plagues" are forcing us to modify our lifestyles in ways that minimize our chances of becoming a statistic in the latest tally of the afflicted. In *Six Modern Plagues*, Mark Jerome Walters offers us the first book for the general reader that

connects these emerging health risks and their ecological origins. Drawing on new research, interviews, and his own investigations, Mark Jerome Walters weaves together a compelling argument: that changes humans have made to the environment, from warming the climate to clearing the forests, have contributed to, if not caused a rising tide of diseases that are afflicting humans and many other species. According to Mark Jerome Walters, humans are not always

innocent bystanders to infectious disease. To the contrary, in the case of many modern epidemics, we are the instigators. Six Modern Plagues, a ground-breaking introduction to the connection between disease and environmental degradation should be read by all those interested in their health and the health of others. *Thirty Years' Experience of a Medical Officer in the English Convict Service* Greenwood  
This quirky, yet important

book, breaks new ground in the study of Gaelic Ireland by exploiting the rich source material contained in the sixteenth-century Annals of Ulster, Annals of Connacht, the Annals of Loch Cé and the Four Masters. While attention has previously been paid to poetry in Irish as a source for the history of the 16th century, the richness of the prose sources have not been exploited by historians. The annals contain a series of short accounts of events arranged by year.

The storytelling of the annalists provides the openings into the past that are the key to this book, which uses seven of their longer stories to examine, at micro level, aspects of Gaelic society that created them. The significance of each story is illuminated by reference to other contemporary evidence, including the genealogies and the poetry. The text is provided in both the original Irish with an English language translation, with extensive writings placing the

passages in their historical time.

From the preface: This

study of subject-verb

inversion is mainly

corpus-based. The corpus

comprises both fiction and

non-fiction. It has not

been "emptied", but we

have treated all the

patterns of inversion (and

relevant patterns of

straight order) we have

found in it. Although we

have made copious use of

exemplification, the

examples given are only a

small fraction of the total

number collected. We

have made use of a

corpus in preference to

introspection because it

gives a better guarantee

of exhaustiveness: time

and again the corpus has

forced us to

accommodate patterns in

our system which

introspection is not likely

to have captured. This

does not mean that we

totally reject

introspection, which we

have used in cases where

there were gaps in our

corpus. Also, we have

drawn on earlier

treatments of inversion.

Of these, special mention

should be made of Bengt

Jacobsson's impressive

monograph. References to

our primary corpus take

the shape of capital

letters followed by page

number, e. g. CPSA 14 (a

list of the abbreviations

used is found on pp.

87-89). Bibliographical

references and references

to examples taken from

the literature on inversion

are given as the name of

the author followed by

page number, e. g.

Jacobsson p. 5 (the

bibliography is found on

pp 90-92). Examples

without any reference after them are constructed.

This is the first major study in English of the work of the French novelist, essayist, journalist, poet and 'chansonnier' Pierre Mac Orlan (1882-1970). It assesses Mac Orlan's contribution to the post-1918 phenomenon of intellectual disillusionment and disorientation which was termed the 'nouveau mal du siècle', or 'inquiétude'.

Although he has largely been ignored by critics thus far, Mac Orlan was part of mainstream French literary production and a major exponent of 'inquiétude'. Where he differs from his contemporaries is in his subject matter, in his use of sociological, rather than abstract, intellectual material. His expression of 'inquiétude' encompasses: 'le fantastique social'; adventure; marginality; 'le cafard'; and sadistic sexuality. His originality lies in his invention of 'le

fantastique social', in his constant use of certain techniques, as well as the subject matter, of German Expressionism via the depiction of the disturbing landscape of the modern city, post-1918 inflation and decadence, prostitutes and criminals, doomed adventurers, the mystery of modern technology, and in the expression of a morbid interest in sexual violence. This volume will be of particular interest to students of inter-war French literature and thought.

While there is little evidence of formal rhetorical instruction in Anglo-Saxon England, traditional Old English poetry clearly shows the influence of Latin rhetoric. *Verse and Virtuosity* demonstrates how Old English poets imitated and adapted the methods of Latin literature, and, in particular, the works of the Christian Latin authors they had studied at

school. It is the first full-length study to look specifically at what Old English poets working in a Latinate milieu attempted to do with the schemes and figures they found in their sources. Janie Steen argues that, far from sterile imitation, the inventiveness of Old English poets coupled with the constraints of vernacular verse produced a vital and markedly different kind of poetry. Highlighting a selection of Old English poetic translations of Latin texts, she considers

how the translators responded to the challenge of adaptation, and shows how the most accomplished, such as Cynewulf, absorb Latin rhetoric into their own style and blend the two traditions into verse of great virtuosity. With its wide-ranging discussion of texts and rhetorical figures, this book can serve as an introduction to Old English poetic composition and style. *Verse and Virtuosity*, will be of considerable interest to Anglo-Saxonists, linguists, and

those studying rhetorical traditions.

 This study focuses on the connection between education and the world of work and the urgency of the endeavor to educate the work force. Part I considers the resources for adult learning in the United States, with a focus on the major providers outside the traditional education system. Technological resources that can extend educational opportunities

and reach more workers are then analyzed. Examples of each medium's use are given, and its limitations and effectiveness for instruction are charted. One new development is given special attention: artificial intelligence as an aid in training and education. Part II describes workers' training opportunities. It looks first at the skilled trades and technical fields: construction workers, office workers, administrative assistants, information systems

technicians, and factory workers encountering computer-integrated manufacturing systems. Next, the education of managers is considered. Finally, updating knowledge of advanced professionals is examined. Examples from various providers show contributions toward available opportunities. Part III deals with those whom training programs fail to reach or serve adequately: dislocated workers, unemployed youth, immigrants and refugees, and welfare

recipients. The report concludes that the issues call for public responsibility and action. Federal, state, and private initiatives are urged. Endnotes for each chapter and an index are appended. (YLB)

Spinoza in English, /i is the first bibliography to document the entire 300-year record of books, monographs, dissertations and articles in English on Benedict Spinoza, as well as all translations of his works into English.

Arranged alphabetically by author or editor, and internally cross-referenced in the case of anthologies and 'replies', this bibliography cites its own sources where appropriate and, in many cases, provides details on how to obtain out-of-print titles and unpublished dissertations. Additionally, it restores or corrects a good deal of earlier bibliographic detail and, beginning with titles from the mid-1800s, presents the citations in a uniform style. This second edition

adds hundreds of citations, including dozens of titles hitherto overlooked, thus bringing the total to nearly 2700 on the main level (with hundreds of secondary references to later editions and reprints). It also provides an index and, occasionally, an abstract when the author's title inadequately describes the contents. As the only source of its kind, this bibliography is an indispensable reference tool for research libraries

and individual scholars concerned with the life and works of Spinoza. Wayne Boucher's introduction is augmented by a preface by Professor Manfred Walther. --the most complete bibliography of works in English on Spinoza -- enlarged, corrected and improved from first edition with numbered entries --uniquely comprehensive, current and authoritative -- numbered entries and subject/title index for easy reference
