Queen of the Owls Globic Press

Published in association with Save the Children Priscilla Alderson examines the often overlooked issue of the rights of young children, starting with the question of how the 1989 UN Convention on the Rights of the Child applies to the youngest children, from birth to eight years of age. The question of finding a balance between young children's rights to protection, to provision (resources and services) and to participation (expressing their views, being responsible) is discussed. The author suggests that, in the belief we are looking after their best interests, we have become overprotective of children and deny them the freedom to be expressive, creative and active, and that improving the way adults and children communicate is the best way of redressing that balance. This second edition has been updated and expanded to include the relevance of UNCRC rights of premature babies, international examples such as the Chinese one-child policy, children's influence on regional policies, and the influence on young children's lives of policies such as Every Child Matters and those of the World Bank, IMF, OECD and UNICEF. This readable, informative and thought-provoking book is a compelling invitation to rethink our attitudes to young children's rights in the light of new theories, research and practical evidence about children's daily lives. It will be of interest to anyone who works with young children.

Službeni List She Writes Press

This Eurydice report sheds light on two different but complementary perspectives of digital education: the development of digital competences relevant to learners and teachers on the one hand, and the pedagogical use of technologies to support, improve and transform learning and teaching on the other. The report covers different areas of digital education starting by an overview of school curricula and learning outcomes related to digital competence. The development of teacher-specific competences during initial teacher education and throughout their career is addressed as well as the assessment of students' digital competences and the use of digital technologies for assessment. Finally, the report gives some insight into current national strategies and policies on digital education at school. The annexes add specific information by country, on school curricula, teacher competence frameworks, top-level strategies and agencies supporting digital education at school. The report covers digital education at primary and general secondary levels for the school year 2018/19 in all 28 EU Member States, as well as Albania, Bosnia and Herzegovina, Switzerland, Iceland, Liechtenstein, Montenegro, North Macedonia, Norway, Serbia and Turkey, 43 education systems in total.

Shkollat dhe arsimi shqip në Maqedoni gjatë periudhës 1941-1944 Skyhorse

Frist published in 1997, this book aims to answer if European 'post-national' citizenship provide a practical opening and a conceptual challenge to cope with the diverse and close-circuiting crises of national European social models? What then might a new sphere of European social inclusion look like? This book also provided the first attempt to go well beyond 'national gridlock'. Old solutions will no longer do. Is new land in sight? With monetary integration almost implemented this is a highly relevant exploration of a central complementary 'common currency' in Europe's future.

Jugoslovenska retrospektivna bibliografska građa Cambridge University Press

This handbook offers a comprehensive review on career guidance, with an emphasis on the applied aspects of guidance together with research methods and perspectives. It features contributions from more than 30 leading authorities in the field from Asia, Africa, America, Australasia and Europe and draws upon a wide range of career guidance paradigms and theoretical perspectives. This handbook covers such subjects as educational and vocational guidance in a social context, theoretical foundations, educational and vocational guidance in practice, specific target groups, testing and assessment, and evaluation.

The Palace of Dreams OUP Oxford

Are Albanians Westerners or Easterners? What side will Albanians take in the clash of civilizations? Is the Albanian culture acceptable to Europe? uch questions are frequently asked in post-communist Albania by intellectuals who perceive the transition as an escape from the East and rush towards the West. In this book the "escape" of Albanians from the ast is conceptualized beyond the issues of transition and integration to the European Union. It is argued that this phenomenon is linked to the politics f identity during the modern history of Albania, from the National awakening to the present day. By analyzing the texts of Albanian intellectuals, such as Naim Frasheri, Krist Maloki, Branko Merxhani, Mitrush Kuteli, Ismail Kadare, Aurel Plasari, Piro Misha, etc., the author argues that the modern Albanian identities are constructed on binary oppositions Europe-Asia, civilization-barbarism, socialism-reactionism, West-East, Christianity-Islam. This work reopens the debate whether the focus on such dichotomies in Albanian contemporary politics and culture promotes the democratization process in Albania and its recent inclusion in the processes of globalization, or intellectual efforts should be made to move beyond them.

Higher Education in Albania Springer Nature

A chance meeting with a charismatic photographer will forever change Elizabeth's life. Until she met Richard, Elizabeth's relationship with Georgia O'Keeffe and her little-known Hawaii paintings was purely academic. Now it's personal. Richard tells Elizabeth that the only way she can truly understand O'Keeffe isn't with her mind—it's by getting into O'Keeffe's skin and reenacting her famous nude photos. In the intimacy of Richard's

studio, Elizabeth experiences a new, intoxicating abandon and fullness. It never occurs to her that the photographs might be made public, especially without her consent. Desperate to avoid exposure—she's a rising star in the academic world and the mother of young children—Elizabeth demands that Richard dismantle the exhibit. But he refuses. The pictures are his art. His property, not hers. As word of the photos spreads, Elizabeth unwittingly becomes a feminist heroine to her students, who misunderstand her motives in posing. To the university, however, her actions are a public scandal. To her husband, they're a public humiliation. Yet Richard has reawakened an awareness that's haunted Elizabeth since she was a child—the truth that cerebral knowledge will never be enough. Now she must face the question: How much is she willing to risk to be truly seen and known?

How All Teachers Can Support Citizenship and Human Rights Education Jessica Kingsley Publishers

'[Gavin Reid] provides some useful links to websites devoted to different approaches. Some of the ideas relating to specific areas of the curriculum, for example, the suggested approaches to the teaching of modern languages, are likely to be particularly valuable. Reid also outlines strategies using learning styles for pupils with learning differences, including attention disorders, dyslexia, developmental co-ordination difficulties, number difficulties, and those on the autistic spectrum' - Times Educational Supplement Extra for Special Needs `We have been lucky enough to hear Gavin speak twice in the last year and those of you who have also heard him will know that he is at the cutting edge of his field. This book really encompasses those areas that are particularly topical and the "buzz" words on everyone's lips! This book clearly sets out "who" is involved in inclusion and "what" is actually meant by learning styles. Gavin not only offers practical strategies but also suggests how "old hands" could vary their teaching styles to appeal to all types of learners. Therefore we feel this book is for the main stream teacher as well as the specialist and, if this is a target area for your school, this book might be a valuable addition to your bookshelf' - SATIPS `In this book, Gavin Reid has grasped the nettle (of inclusion) with both hands and provided a text that is full of common sense and practical suggestions as to how the mainstream teacher can draw upon recent psychological theory and research to enhance the learning of all children. He jumps on no bandwagons but draws judiciously from a wide range of approaches to assessing learning styles and links what can be learned about groups and individuals from such techniques to helpful classroom practice' - Professor Bob Burden, School of Education and Lifelong Learning, University of Exeter `Gavin Reid is that rare professional who not only explains how and why children learn best, but also suggests a myriad of practical strategies to help them. I highly recommend this book for everyone from undergraduates to "old hands" working toward successful inclusion. Parents, too, will profit from Dr. Reid's wise and comprehensive experience' - Jane M. Healy, Ph.D., Educational Psychologist and Author of "Your Child's Growing Mind: Brain Development and Learning from Birth to Adolescence." 3rd Edition. NY: Broadway Books, 2004. Drawing on his considerable experience as a teacher, educational psychologist, lecturer and author, Gavin Reid illustrates how to assess pupils' different learning styles and how to vary your teaching style to appeal to all types of learners, including disaffected students and those with special educational needs. This book provides an overview of the different stages in the learning cycle; describes the differences between learners; and emphasizes the role the classroom environment and different teaching styles play in children's ability to learn. Readers will see how an understanding of learning styles can be used to encourage and promote good inclusive practice. Ideas for assessment of learning styles and examples of different teaching styles will prove invaluable to class teachers, trainee teachers, SENCOs, LEA advisers; NQTs and NQT advisers and school management

The Last Lecture Council of Europe

Masterful in its simplicity, Chronicle in Stone is a touching coming-of-age story and a testament to the perseverance of the human spirit. Surrounded by the magic of beautiful women and literature, a boy must endure the deprivations of war as he suffers the hardships of growing up. His sleepy country has just thrown off centuries of tyranny, but new waves of domination inundate his city. Through the boy's eyes, we see the terrors of World War II as he witnesses fascist invasions, allied bombings, partisan infighting, and the many faces of human cruelty—as well as the simple pleasures of life. Evacuating to the countryside, he expects to find an ideal world full of extraordinary things, but discovers instead an archaic backwater where a severed arm becomes a talisman and deflowered girls mysteriously vanish. Woven between the chapters of the boy's story are tantalizing fragments of the city's history. As the devastation mounts, the fragments lose coherence, and we perceive firsthand how the violence of war destroys more than just buildings and bridges.

The Philosophy Foundation Provocations Andrews McMeel Publishing

This book is ideal for teachers, whether they are P4C trained or just experimenting with philosophy. It will help teachers to present ideas and stimulate discussions which both accommodate and engage adolescent appetites. Are human beings flawed? Is murder an act of insanity or just plain thoughtlessness? Do we need a soul? From the fall of Icarus to the rise of Caesar this practical book draws upon history, philosophy and literature to provoke students to think, question and wonder. Divided into chapters on The World, Self, Society and Others, this resource for secondary school is written to give teachers the means to listen rather than teach and to allow the ideas and thoughts of students to form the centre of the lesson. It raises questions on the nature of evil, belief in God, slavery, consumerism, utopia, the limits of freedom, and a whole lot more. With a clear introductory outline on its use both in and out of the classroom, Provocations also contains tips and advice to help guide teachers to span the curriculum. Applicable to History, Geography, RS, Science, Art, English and Citizenship it offers teachers of all subjects the opportunity to introduce a student-centred approach to their lessons. There is also an extensive bibliography for those who wish to explore the topics in greater depth. Provocations is a set of philosophy sessions designed for secondary school and predicated on the pedagogical methods of The Philosophy Foundation.

These sessions are mature, challenging and provocative, using history, literature, myth and the world today as their basis. Each session contains particular pedagogical tips and advice and suggestions as to how they can be effectively delivered

"We cannot change the cards we are dealt, just how we play the hand."---Randy Pausch A lot of professors give talks titled "The Last Lecture."

Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave--"Really Achieving Your Childhood Dreams"--wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because "time is all you have...and you may find one day that you have less than you think"). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

Making the leap to Cambridge IGCSE can be a challenge - this brand new course leads learners smoothly through all three stages of Cambridge Secondary 1 Physics up to Cambridge Checkpoint and beyond, with crucial rigour built in from the outset so they can dive into Cambridge IGCSE Science study with confidence.

Improving Human Learning in the Classroom R&L Education

Why do some companies continue to be successful while others experience difficulties and even failure? In *Leading Strategic Change*, Eric Flamholtz and Yvonne Randle demonstrate that the key to long-term organizational success is the ability to adapt to and manage different types of change.

Drawing on over 30 years' consultancy experience within major firms, they combine theoretical and practical models of organizational change, together with a new theory of leadership, to build a framework for understanding, planning, and leading change. The scope and value of this framework is then shown in relation to nine real-world case studies, ranging from relatively small companies (IndyMac Bank, Infogix) to large multinationals (Starbucks, Westfield). The focus throughout is to provide practical guidance to those concerned with managing and leading change in organizations. This book is an excellent guide to the many lessons to be learned about successful organizational change.

This publication sets out the core competences needed by teachers to put democratic citizenship and human rights into practice in the classroom, throughout the school and in the wider community. It is intended for all teachers, not only specialists but teachers in all subject areas, and teacher educators working in higher-education institutions or other settings, both in pre- and in-service training. Some 15 competences are presented and grouped into four clusters. Each cluster of competences corresponds to one chapter, within which the competences are described in detail and exemplified. The reader will find progression grids and suggested developmental activities for each competence: these grids, featuring focusing, developing, established and advanced practice, aim to help teachers and teacher educators determine the level to which their professional practice corresponds, and thus identify specific and practical improvements upon which they can focus.

This collection of 1,001 English idioms is a highly useful tool for students of the English language. The Idioms are divided into eighteen relevant topics: Food, Body, Animals, Money, Comparison, Nature, Colors, Numbers, Love and War, Clothes, Home, Work, World, School, Sports, People, and Country. Each unit consists of a wide selection of idioms that are explained and used in great examples to clearly illustrate the true point of each idiom. Each unit is followed by practice exercises to help the students reinforce the use and meaning of the idioms. This book is also a highly reference tool for teachers of English as a second language.

European Citizenship and Social Exclusion Routledge

Improving Human Learning in the Classroom provides a functional and realistic approach to facilitate learning through a demonstration of commonalities between the various theories of learning. Designed to assist educators in eliciting students' prior knowledge, providing feedback, transfer of knowledge, and promoting self-assessment, Taylor and MacKenney provide proven strategies for infusing various learning theories into a curriculum, guiding educators to find their own strategies for promoting learning in the classroom. Both quantitative and qualitative research methods investigate learning theories and reforms in education. Quantitative data sources build the theoretical framework for educating the student, as well as developing strategies for closing the achievement gap. Taylor and MacKenney fuse personal experiences with solid strategies for human learning.

[Homeri në letërsinë dhe kulturën shqiptare](#) Crown House Publishing

This book presents a new and refreshing look at student assessment from the perspective of leading educational theorists, researchers, and practitioners. The authors call for boundary-breaking assessment that reflects clear understandings of the purposes of assessment, a balance of assessment creativity and realism, the ability to detect solutions for assessment challenges, and the capacity to question and imagine assessment alternatives. The 14 chapters offer school and district educators, policy makers, researchers, and university teacher preparation faculty with a comprehensive, current overview of the state and art of student assessment. Key questions are posed about assessment and critical challenges are presented along with sound evidence-based solutions. Student assessment is analyzed in terms of its relationship with classroom instructional practices and large-scale testing programs. Formative and summative assessments are compared and contrasted. The role of psychological assessment in informing classroom practices is profiled along with the need for student voice in fair assessment practices. Readers will be challenged to consider the ecology of student assessment, that is, the impact of assessment in classrooms and schools through to the macro level of globalized societies. The underpinning values and assumptions of student assessment are highlighted. Finally, a rationale is offered for reconceptualizing and redefining assessment.

Jesus Rollerblading Christ--another helping of TheOatmeal! Mrow, MOAR kitty comics. Mr. Oats delivers a sidesplitting serving of cat humor in his new book, *How to Tell If Your Cat Is Plotting to Kill You*. If your cat is kneading you, that's not a sign of affection. Your cat is actually checking your internal organs for weakness. If your cat brings you a dead animal, this isn't a gift. It's a warning. *How to Tell If Your Cat Is Plotting to Kill You* is a hilarious, brilliant offering of comics, facts, and instructional guides about crazy cat behaviors from the creative wonderland at TheOatmeal.com. *How to Tell If Your Cat Is Plotting to Kill You* presents fan favorites, such as "Cat vs. Internet," "How to Pet a Kitty," and "The Bobcats," plus 17 brand-new, never-before-seen cat-themed comic strips. This Oatmeal collection is a must-have for cat-lovers from Mr. Oats!

[Arsimi në Republikën Popullore Socialiste të Shqipërisë](#) McGraw-Hill/Appleton & Lange

From Ismail Kadare, winner of the inaugural Man Booker International Prize - a novelist in the class of Coetzee, Pamuk, Márquez, and Rushdie - the stunning new translation of one of his major works. In the early fifteenth century, as winter falls away, the people of Albania know that their fate is sealed. They have refused to negotiate with the Ottoman Empire, and war is now inevitable. Soon enough, dust kicked up by Turkish horses is spotted from a citadel. Brightly coloured banners, hastily constructed minarets, and tens of thousands of men fill the plain below. From this moment on, the world is waiting to hear that the fortress has fallen. The *Siege* tells the enthralling story of the weeks and months that follow - of the exhilaration and despair of the battlefield, the constantly shifting strategies of war, and those whose lives are held in the balance, from the Pasha himself to the artillerymen, astrologer, blind poet, and harem of women who accompany him. "Believe me," the general said. "I've taken part in many sieges but this," he waved towards the castle walls, "is where the most fearful carnage of our times will take place. And you surely know as well as I do that great massacres always give birth to great books. You really do have an opportunity to write a thundering chronicle redolent with pitch and blood, and it will be utterly different from the graceful whines composed at the fireside by squealers who never went to war." Brilliantly vivid, as insightful as it is compelling, *The Siege* is an unforgettable account of the clash of two great civilisations, and a portrait of war that will resonate across the centuries.

[The Preparation of Teachers](#)

Translated from the Jusef Vrioni's French version of the Albanian original, this is the author's own vision of totalitarianism.
