About the Book: Of late, academicians of technical education have felt the importance of "Management" and "Entrepreneurship". Engineers need to manage their

departments/sections/subordinates, and Entrepreneurship helps the large pool of technical manpower in developing small-scale industries in high tech areas thereby contributing to the economy of the country. This book covers both 'Management' and 'Entrepreneurship'.

The first chapters of this book deal with Management, Planning, Organizing and Staffing, Directing and Controlling. The last four chapters deal with Entrepreneurship, Small-Scale Industries, Institutional support and Project formulation. Adequate number of simple examples with which the students are familiar are included in each chapter. In addition, each chapter contains student learning activities to give the readers a chance to enhance the learning process.

Though the book is written keeping in mind the syllabus of Visvesvaraya Technological University, yet it is useful for B.Com, BBM, DBM, . PGDBM and MBA students also. Contents: Management Planning Organizing and Staffing Directing and Controlling Entrepreneurship Small-Scale Industries Institutional Support Preparation of Project.

The Book focuses on the probable Demand and outturn of teachers in India

at School Stage. An attempt has been made by authors to estimate the requirement of teachers in school and their outturn from the teachers training institutes and the Education colleges. This exercises has been done for all levels i.e., Primary middle, High and Higher Secondary for India and various states. The various scenarios are drawn assuming the employment rates as 70, 80, 90 and 100 per cent. It has been noted through this analysis that there exist a gap between the requirement and availability of teachers. The requirement seems to be on the higher side and it increases as the enrolment rate is enhance upward. Secondly, the book highlights that there are still existence of untrained teachers in different states. The percentage of untrained teachers varies among the states. A training plan has also been made in this book to give some idea of expenditure in order to train the untrained teachers.

Singapore Business Lulu Publication
This book is useful for B.Com., M.Com., and MBA students of all Indian Universities. Presentation of various aspects of entrepreneurship is the most salient features of this book. Clarity of all topics has been given throughout. Description of the most difficult topics, in a simple and easy to follow style, has been the authors main attempt. At the end of the each chapter Assessment Questions are included in this book. Glossary, Bibliography, Author Index, Subject Index and Abbreviations are incorporated at the end of the book.

Introduction The Indian Startup Ecosystem showed robust performance in 2021 and continues to do so in 2022. In this book, the performance statistics

of several startups in India have been explored, along with some of the reasons why the economy is conducive to the growth of startups. Body The author has explored the causes behind the growth of startups in India and explained that India has the third highest number of startups globally. It is only behind USA and China when it comes to startups. Whether in acquiring funds or getting the government's support, the economy is ideal for the growth of startups. The author has also explored at length the growth of several startups and how these have gone on to become recognized brands. In addition, several of these startups are now recognized eCommerce platforms. Finally, the author has provided case studies of startups from different industrial sectors. Several of these are from travel, B2B, and consumer-facing startups. He explained that the startup boom has led to economic growth in India. Although startups are considered relatively new in India, the recent lockdowns and pandemic have affected their growth. But the author believes that there will be changes that will modernize the startup economy further.

Applied Engineering Decisions in the Context of Sustainable Development

Journal of Small Business and Entrepreneurship Routledge

A moral dilemma gripped Professor Gupta when he was invited by the Bangladeshi government to help restructure their agricultural sector in 1985. He noticed how the marginalized farmers were being paid poorly for their otherwise unmatched knowledge. The gross injustice of this constant imbalance led Professor Gupta to found what would turn into a resounding social and ethical movement—the Honey Bee Network—bringing together and elevating thousands of grassroots innovators. For over two decades, Professor Gupta has travelled through rural lands unearthing innovations by the ranks—from the famed Mitti Cool refrigerator to the footbridge of Meghalaya. He insists that to fight the largest and most persistent problems of the world we must eschew expensive research labs and instead, look towards ordinary folk. Innovation—that oft-flung around word—is stripped to its core in this book. Poignant and personal, *Grassroots Innovation* is an important treatise from a social crusader of our time.

Women Entrepreneurship in India
Random House India

The purpose of this research is to examine the entrepreneurial ethics among small scale entrepreneurs. The study has been commenced with three objectives such as, measuring demographic background, entrepreneurial ethics in functional areas and developing entrepreneurial ethics. The study has been started with 100 small scale entrepreneurs and it is randomly selected. The required primary data was obtained by using a structured questionnaire design. The total number of questionnaires distributed was 286, out of which 260 were returned. Descriptive research design was used for formulating the research study. The statistical tools used include simple percentage analysis, Kendall's Coefficient of Concordance with the necessary hypothesis and T-test. The results showed that integrity is the most important factor while maintaining ethics among small scale entrepreneurs, it is followed by public spiritedness, accountability, transparency, honesty and fairness in the different functional areas. Kendall's coefficient of concordance rejects null hypothesis and it stated that there is significance difference in ranking by the entrepreneurs as to different functional areas. Developing entrepreneurial ethics is mainly depend on straight forward mentality, responsiveness, support to all stakeholders, customer relationship and moral values. It can be concluded that entrepreneurial ethics is required so as to make better external ethical image, and to have a functional and credible business environment.

Entrepreneurship Development in India Pearson Education India

This book is a unique guide to making the world a better place. Experts apply a critical eye to the United Nations'

Sustainable Development agenda, also known as the Global Goals, which will affect the flow of \$2.5 trillion of development aid up until 2030. Renowned economists, led by Bjorn Lomborg, determine what pursuing different targets will cost and achieve in social, environmental and economic benefits. There are 169 targets, covering every area of international development – from health to education, sanitation to conflict. Together, these analyses make the case for prioritizing the most effective development investments. A panel of Nobel Laureate economists identify a set of 19 phenomenal development targets, and argue that this would achieve as much as quadrupling the global aid budget.

Business India Trans Tech Publications Ltd

The process of liberalization and economic reforms since 1991 besides creating tremendous opportunities for the growth of entrepreneurship and SSIs has also thrown up new challenges of building competitive strengths, introducing technology up-gradation and quality improvement, and increasing productivity. *Entrepreneurship Development and Small Business Enterprises* examines these issues and offers valuable insight to students of this subject. It successfully reduces the gap between practical industry experiences and theoretical institutional studies by giving real and practical examples.

Rājasāhī Bīśvabidyālaya Śṭāḍija Concept Publishing Company

Women in the Face of Globalisation Mittal Publications

Asia is in the midst of a truly historic transformation. If it continues to grow on its recent trajectory, it could, by 2050, account for more than half of global GDP, trade and investment, and enjoy widespread affluence. Its per capita income could rise sixfold. It thus holds the promise of making some 4 billion Asians, hitherto commonly associated with poverty and deprivation, affluent by today's standards. This study, *Asia 2050: Realizing the Asian Century*, is aimed at key opinion makers to foster debate on a vision of and strategy for Asia's potentially historic rise among the global community of nations between now and 2050. It offers a long-term perspective of the Asia region as a whole as opposed to the more common approach that delivers a short- to medium-term perspective of selected countries, subregions or issues.

Entrepreneurship Development in Developing Countries Blue Rose Publishers

How do we create employment, grow businesses, and build greater economic resilience in our low-income communities? How do we create economic development for everyone,

everywhere – including rural towns, inner-city neighborhoods, aging suburbs, and regions such as Appalachia, American Indian reservations, the Mexican border, and the Mississippi Delta – and not just in elite communities? Economic Development for Everyone collects, organizes, and reviews much of the current research available on creating economic development in low-income communities. Part I offers an overview of the harsh realities facing low-income communities in the US today; their many economic and social challenges; debates on whether to try reviving local economies vs. relocating residents; and current trends in economic development that emphasize high-tech industry and high levels of human capital. Part II organizes the sprawling literature of

applied economic development research into a practical framework of five dynamic dimensions: empower your residents: begin with basic education; enhance your community: build on existing assets; encourage your entrepreneurs; diversify your economy; and sustain your development. This book, assembled and presented in a unified framework, will be invaluable for students and new researchers of economic development in low-income communities, and will offer new perspectives for established researchers, professional economic developers and planners, and public officials. Development practitioners and community leaders will also find new ideas and opportunities, along with a broad view on how the many complex parts of economic development interconnect.
