The function of the painted wooden object ranges from the practical to the profound. These objects may perform utilitarian tasks, convey artistic whimsy, connote noble aspirations, and embody the highest spiritual expressions. This volume, illustrated in color throughout, presents the proceedings of a conference organized by

the Wooden Artifacts Group of the American Institute for Conservation of Historic and Artistic Works (AIC) and held in November 1994 at the Colonial Williamsburg Foundation in Williamsburg, Virginia. The book includes 40 articles that explore the history and conservation of a wide range of painted wooden objects, from polychrome sculpture and altarpieces to carousel horses, tobacconist figures, Native American totems, Victorian garden furniture, French cabinets, architectural elements, and horse-drawn carriages. Contributors include Ian C. Bristow, an architect and historic-building consultant in London; Myriam Serck-Dewaide, head of the Sculpture Workshop, Institut Royal du Patrimoine Artistique, Brussels; and Frances Gruber Safford, associate curator of American decorative arts at the Metropolitan Museum of Art in New York. A broad range of professionals—including art historians, curators, scientists, and conservators—will be interested in this volume and in the multidisciplinary nature of its articles.

Regenerative medicine (RM) is a rapidly expanding topic within orthopedic and spine surgery, sports medicine and rehabilitation medicine. In the last ten years, regenerative medicine has emerged from the fringes as a complement and challenge to evidence-based medicine. Both clinicians and patients alike are eager to be able to offer and receive treatments that don't just surgically replace or clean old joints or inject away inflammation or work as a stop-gap measure.

Regenerative medicine encompasses everything from the use of stem cells and platelet-rich plasma (PRP) to prolotherapy, viscosupplementation and beyond. This book will provide healthcare practitioners dealing with spine and joint pain with the most current, up-to-date evidence-based information about which treatments work, which treatments don't, and which are on the horizon as potential game changers. Chapters are arranged in a consistent format and cover the spine, shoulder, elbow, hand and wrist, hip, knee,

and foot and ankle, providing a thorough, top-to-bottom approach. A concluding chapter discusses current and future directions and applications of RM over the next decade or two. Timely and forward-thinking, *Regenerative Medicine for Spine and Joint Pain* will be a concise and practical resource for orthopedists, spine surgeons, sports medicine specialists, physical therapists and rehabilitation specialists, and primary care providers looking to expand their practice.

This book critically engages with the contemporary challenges and opportunities of wild cities in a climate of change. A key focus of the book is exploring the nexus of possibilities for wild cities and the eco-ethical imagination needed to drive sustainable and resilient urban pathways. Many now have serious doubts about the prospects for humanity to live within cities that are socially just and responsive to planetary limits. Is it possible for planning to better serve, protect and nurture our human and non-human worlds? This

book argues it is. Drawing on international literature and Australian case examples, this book explores issues around climate change, colonization, urban (in)security and the rights to the city for both humans and nature. It is within this context that this book focuses on the urgent need to better understand how contemporary cities have changed, and the relational role of planning within it. *Planning Wild Cities* will be of particular interest to students and scholars of planning, urban studies, and sustainable development, and for all those invested in re-shaping our 'wild' city futures.

In 1994, more than 20 years after the military coup of 1973, I returned to Chile to speak with the arpilleristas. While the Chileans were electing the second president of a democratic regime (Eduardo Frei), I taped the testimonies of eight women whom I had not been able to forget during my years of exile in the United States. I recorded their stories so the pain and suffering of so many human beings would not be totally in vain and so that, upon reading their testimonies, we might learn the immeasurable worth of human rights and teach future generations to defend them throughout the world. -- Emma Sepulveda
