In the second and third centuries A.D. Alexandria was the meeting-point of three distinct cultural streams, namely the Jewish-Alexandrine philosophy, Platonism, and Gnosticism, all of which had an influence on Alexandrine orthodox Christianity. Starting from the assumption that the thought of a Christian Father like Clement of Alexandria cannot be fully understood without taking this influence into account, the author examines in detail Clement's close dependence on the Jewish-Alexandrine philosophy, Middle Platonism, Neoplatonism, and Gnosticism in such matters as his attitude towards Greek philosophy, ethics, his views on 'pistis' and 'gnosis', cosmology and theology. Particular attention has been paid to the Gnostic texts from Nag-Hammadi so far published.

Stock Publishers Depression is real. Even one small trigger is enough to survive. After the sudden death of his psychiatrist father, the son sets on a journey to his father's unexplored world of patients and their problems, only to find a set of blank suicide notes. Having never shown interest in his father's profession, the inquisitiveness triple folds and the son contemplates whether his

father was really a good psychiatrist. Finding blank suicide notes, no names of the patients are helping him. The only possible communication he finds is the patients' addresses. With his wedding nearing, the son finds the suicide stories. As he reads through their sentimental and depressed lives, he can't help but stumble upon an unusual suicide note. The stories are then told by each of the

patients. The story first uncovers their problems and then on how they each contemplated suicide. After exhausting all the suicide stories, the son invites them to his wedding; thankful for the addresses on the suicide files. But, does he have high hopes? A hope that they would attend his wedding - a hope that, after all, his father was not bad at his profession; a hope that his father had indeed cured some people.

Will they make it to the wedding? Will there be a survival story or just their depressing stories?

The sublimity of

Muhammad's preaching in Mecca and the severity of his sermons in Medina make Islam a Janus-faced faith that forever bedevils the mind of the Musalmans. This thought-provoking work, besides dissecting the anatomy of Islam, steeped in the Quran, seeks to depict the psyche of the Musalmans, shaped by the proclivities of their prophet, vicissitudes of his life and the attitudes of his detractors, which the mechanism of

their umma perpetuates. More to the point, aided by "I'm Ok - You're Ok", the path-breaking work of Thomas A. Harris and Roland E. Miller's "Muslim Friends-Their Faith and Feeling", this book, for the first time ever, psycho-analyzes the imperatives of the Muslim upbringing, which has the potential to turn a faithful and a renegade alike into a fidayeen. Also, apart from delving into

the ironies of the faiths that affected the fate of the peoples, eclipsed the cultures of communes, altered the course of history and afflict the politics of the day, this book examines how the sanātana 'Hindu' dharma came to survive in India, in spite of the combined onslaught of Islam and the Christianity on Hinduism for over a millennium. This book is for those who wish to be aware of the

follies of their faith and the foibles of others to lighten the burden of dogma and reduce the baggage of prejudice postulated in its thirty-five well-structured chapters. Also, besides providing a panoramic view of the Indian history, this thought-provoking book appraises the way Gandhi, Nehru, Patel, Azad, Ambedkar, Indira Gandhi, Narasimha Rao, Vajpayee, Manmohan Singh, Sonia Gandhi, Narendra Modi et al made or unmade the post-colonial India. Possibly in a new genre, this free ebook is a book for our times.

 This vital text for oncologists and radiotherapists provides an in-depth account of all aspects of radioembolization, a relatively novel technique based on the

efficacy of radiotherapy for the treatment of liver tumors. Radioembolization combines embolization (intravascular deployment of particles - microspheres loaded with yttrium-90) and brachytherapy (local administration of radiotherapy), thereby allowing delivery of high doses of beta-radiation specifically to the tumoral area.

An enormously satisfying, exciting and enriching book, Vikram Chandra's novel draws the reader deep into the lives of detective Sartaj Singh and Ganesh Gaitonde, the most wanted gangster in

India. Sartaj, the only Sikh inspector in the whole of Mumbai, is used to being identified by his turban, beard and the sharp cut of his trousers. But 'the silky Sikh' is now past forty, his marriage is over and his career prospects are on the slide. When Sartaj gets an anonymous tip off as to the secret hideout of the legendary boss of the G-company, he's determined that he'll be the one to collect the

prize. This is a sprawling, epic novel of friendships and betrayals, of terrible violence, of an astonishing modern city and its underworld. Drawing on the best of Victorian fiction, mystery novels, Bollywood movies and Vikram Chandra's years of first hand research on the streets of Mumbai, this novel reads like a potboiling page-turner but resonates with the intelligence

and emotional depth of the best of literature.
