In France's Third Republic, secularism was, for its adherents, a new faith, a civic religion founded on a rabid belief in progress and the Enlightenment conviction that men (and women) could remake their world. And yet with all of its pragmatic smoothing over of the supernatural edges of Catholicism, the Third Republic engendered its own fantastical ways of seeing by embracing observation, corporeal dynamism, and imaginative introspection. How these republican ideals and the new national education system of the 1870s and 80s - the structure meant to impart these ideals - shaped belle époque popular culture is the focus of this book. The author reassesses the meaning of secularization and offers a cultural history of this period by way of an interrogation of several fraught episodes which, although seemingly disconnected, shared an attachment to the potent moral and aesthetic directives of French republicanism: a village's battle to secularize its schools, a scandalous novel, a vaudeville hit featuring a nude celebrity, and a craze for female boxing. Beginning

with the writer and performer Colette (1873-1954) as a point of entry, this re-evaluation of belle époque popular culture probes the startling connections between republican values of labor and physical health on the one hand, and the cultural innovations of the decades preceding World War I on the other.

These two volumes examine a significant but previously neglected moment in French cultural history: the emergence of French film theory and criticism before the essays of André Bazin. Richard Abel has devised an organizational scheme of six nearly symmetrical periods that serve to "bite into" the discursive flow of early French writing on the cinema. Each of the periods is discussed in a separate and extensive historical introduction, with convincing explications of the various concepts current at the time. In each instance, Abel goes on to provide a complementary anthology of selected texts in translation. Amounting to a portable archive, these anthologies make available a rich selection of nearly one hundred and fifty important texts, most of them never before published in English.

This first book-length study of girls' primary education in France gives a concrete picture of how Frenchwomen were, and are, prepared for their roles in society. Until the 1960s, the primary school provided the only formal education for the majority of French children. Long recognized as a major inculcator of patriotic and moral values, the French

primary school also played the vital role of preparing girls for their expected adult lives. Linda L. Clark describes in detail this socialization process. By analyzing a wide variety of documents from 1870 to the present--textbooks, curriculum materials, students' notebooks, examination questions, inspectors' reports, and teachers' memoirs--she has uncovered not only what was taught to girls, but the social and political assumptions that lay behind the primary school's messages about feminine personalities and activities. The book goes on to establish the relationship of feminine images to important aspects of French social, economic, and political life. A chapter on the preparation of girls for the world of work, for example, reveals the discrepancy between formal teaching about "femininity" and women's actual participation in society.

Sport Berghahn Books

This book analyses the legal literacy, knowledge and skills of people in premodern and modernizing Europe. It examines how laymen belonging both to the common people and the elite acquired legal knowledge and skills, how they used these in advocacy and legal writing and how legal literacy became an avenue for social mobility. Taking a comparative approach, contributors consider the historical contexts of England, Finland, France, Germany, Italy and Sweden. This book is divided into two main parts. The first part discusses various groups of legal literates (scriveners, court of appeal judges and advocates) and their different paths to legal literacy from the Middle Ages to the nineteenth century. The second part analyses the rise of the ownership and production of legal literature - especially legal books meant for laymen - as means for acquiring a degree of legal literacy from the eighteenth to the early twentieth century.

### Colette's Republic

Le vieillissement de la population confronte de plus en plus le praticien aux patients particuliers que sont les sujets âgés. Outre l'examen clinique traditionnel, l'évaluation gérontologique standardisée (EGS) doit rentrer dans la pratique courante de tout généraliste. Cet examen permet d'évaluer l'ensemble des fonctions cognitives, sociales, et l'autonomie fonctionnelle d'un patient. À l'aide des nombreux tests courts et pratiques de diagnostic, cet ouvrage permet au praticien de suivre l'évolution physique et psychique des personnes âgées. Il propose tout d'abord un examen clinique spécifique (évaluation cognitive, thymique, nutritionnelle, de l'équilibre et de la marche, évaluation fonctionnelle et de l'autonomie), puis un état des lieux des pathologies gériatriques, des pathologies neurodégénératives et des troubles du comportement. Cette nouvelle édition présente notamment les outils opposables à PATHOS (outil d'évaluation des états pathologiques en EHPAD) et propose des tests plus spécifiques à l'attention des sujets fragiles afin de dépister suffisamment tôt cette fragilité et un certain nombre de déficits pour mettre en place des attitudes de prévention, de traitement et de prises en charge efficaces. Ce guide s'intègre parfaitement dans la pratique des médecins généralistes, des médecins coordonnateurs en EHPAD et de tous les praticiens dans le suivi de leurs patients âgés.

### For Health and Beauty

In parallel columns of French and English, lists over 4,000 reference works and books on history and the humanities, breaking down the large divisions by subject, genre, type of document, and province or territory. Includes titles of national, provincial, territorial, or regional interest in every subject area when available. The entries describe the core focus of the book, its range of interest, scholarly paraphernalia, and any editions in the other Canadian language. The humanities headings are arts, language and linguistics, literature, performing arts, philosophy, and religion. Indexed by name,

title, and French and English subject.

This book is a groundbreaking study of etiquette in the nineteenth century when the success of etiquette books reached unprecedented heights in Britain, France, Italy, the Netherlands, and the United States. It positions etiquette as a fully-fledged theoretical concept within the fields of politeness studies and historical pragmatics. After tracing the origin of etiquette back to Spanish court protocol, the analysis takes a novel approach to key aspects of etiquette: its highly coercive and intricate scripts; the liminal rituals of social gatekeeping; the fear for blunders; the obsession with precedence.

Interrogating the complex relationship between historical etiquette and adjacent notions of politeness, conduct, morality, convention, and ritual, the study prompts questions on gender stereotyping and class privilege surrounding the present-day etiquette revival. Through adopting a unique comparative approach and a corpus-based methodology this study seeks to revitalise our understandings of etiquette. This book will be of interest to scholars of historical linguistics and pragmatics, as well as those in neighbouring fields such as literary criticism, gender studies and family life, domestic and urban spaces.

### French Film Theory and Criticism: 1907-1929

Libraries continually focus on adaptation and adopt different transformation strategies to achieve this goal. These strategies demonstrate a clear desire to stay in tune with the times, while retaining the basic principles that underpin their day-to-day work and ensure they continue to exist. This book is a complete synthesis, a helpful resource for librarians and information professionals that develops four major strategies. The first focuses on understanding the environment and society, with organizational changes affecting cultural institutions (public or private), and the emergence of the library space. The second shows how management methods evolve within them (participatory approach, benevolence, empathy) with an emphasis on project

management. The third strategy focuses on the integration of new library tools to better reach audiences. Finally, the fourth develops an essential and indispensable aspect of library marketing.
