A stock is basically a share of the company. A share refers to a part of the company, including its finances and every other asset that it owns. When the company decides to go public with its shares, it announces an IPO or initial public offering. Anybody interested in buying the shares will then approach the company and pay the share value to own the shares. This is known as primary selling. These shares are then sold in the share market. The share market is a huge

place where buyers and sellers converge to conduct daily trade. These shares are then bought and sold, and the seller capitalizes on the current price of the share, which will be much higher than what he had bought it at. The buyer will have the chance to capitalize on the share once its value rises. Companies decide to go public with their shares due to many reasons. But the main reason is to raise capital for their business. So, they will value their company and split the shares. They will then value individual shares depending on their market capture and asset to liability ratio. A small company might capture a big market share, and a big company might capture a small share. It depends on the individual company's board members' decision. The stock market is huge, and there are many companies that list their shares. As an investor, the stock market offers you the opportunity to increase your income without taking on the high risks that are usually associated when venturing in other businesses. By selling stocks, the company raises capital and is able to expand itself exponentially. Therefore, as an investor, when you purchase shares of a company, you have increased the worth of the company. Thus it's a win-win situation for both investor and owner. The negative risk associated with the stock market can be small or large, but it all depends on the number of shares of stock that you, as an investor, have bought. Therefore, if a company's stock shares lose value, the stocks you have bought also loses value, and if you decide to sell your stocks when the value is low, you will have incurred a loss. I will show you how you can minimize your risks and show you

different ways in which investors are not only making money, but are also building with the stock market.

How I learned to Invest When I started investing in the stock market, at 16 years old, it was overwhelming. There were many technical terms that I did not understand. I did not know how to find a good stock or even when to buy a stock. It was even more overwhelming that there were so many investing strategies- short selling, day trading, long-term investing; I did not know which one was the best for me. Even worse was

that I did not know how to get started without the fear of losing my money. For many days, months and years, I studied the strategies that successful investors like Warren Buffet have used to become the best. After discovering an easy-to-learn formula for investing in stocks, I decided to create my portfolio. My first stock quickly jumped over 30%, and my second one increased by over 15% in less than 3 months. With an average investor gaining 8% per year, I destroyed the market, gaining 25% in only 3 months. After my success, I knew that my strategy is the best and foolproof. This strategy is so simple and effective that a 16-year-old kid was able to learn it and implement it. The strategy was created by a beginner investor, and for beginner investors. This is one of the only strategies that require no previous investing knowledge and can be easily understood. Stock Market Investing For Beginners MATTHEW R. HILL, HENRY KRATTER A former janitor and gas station attendant in Vermont, who died a few years ago, surprised everyone by leaving an \$8 million fortune to his local library and hospital. What was his secret, everyone wondered? And the

answer turned out to be pretty basic. Because, besides being industrious and frugal, which you may have guessed, he had invested in the stock market throughout the years. This is actually not as surprising as it may sound. According to a recent World Wealth Report, the wealthy invest the largest part of their money into stocks and businesses. Our wise janitor had simply done what the wealthy do. So he got a similar result. That is, he grew his money into considerable wealth. And you can do this too. Now, we aren't saying you will make \$8 million. After all, this is a beginners book and the janitor had an extraordinary result. But stock market investing is one of the best tools you can use to build a more secure financial future for you and your family. So are you someone who wants to make money in the stock market? And does that story make you feel excited? Have you tried to understand the stock market, only to be discouraged by how complicated it all seems? And aren't you just a little bit encouraged that an ordinary person, like our janitor from Vermont, could invest in stocks and

succeed? If you answered yes to any of those questions, then this book just might be the solution you've been looking for. Because it will show you just what you need to know, and no more, to start investing in the stock market. And it will describe all of this for you in simple terms you already understand.
